A journal in poems from the first years after the sudden, unexpected end of a forty-year marriage.Illustrated with abstract digital collages by John P. Wise Frannie Cavanaugh is a good Catholic girl with a bit of a wicked streak. She has spent years keeping everyone at a distance---even her closest friends---and it seems as if her senior year is going to be more of the same . . . until Luc Cain enrolls in her class. No one knows where he came from, but Frannie can't seem to stay away from him. What she doesn't know is that Luc is on a mission. He's been sent from Hell itself to claim Frannie's soul. It should be easy---all he has to do is get her to sin, and Luc is as tempting as they come. Frannie doesn't stand a chance. But he has to work fast, because if the infernals are after her, the celestials can't be far behind. And sure enough, it's not long before the angel Gabriel shows up, willing to do anything to keep Luc from getting what he came for. It isn't long before they find themselves fighting for more than just Frannie's soul. But if Luc fails, there will be Hell to pay . . . for all of them. In his acclaimed novels of alternate history, Harry Turtledove has scrutinized the twisted soul of the twentieth century, from the forces that set World War I in motion to the rise of fascism in the decades that followed. Now, this masterly storyteller turns his eyes to the aftermath of World War II and asks: In an era of nuclear posturing, what if the Cold War had suddenly turned hot? Bombs Away begins with President Harry Truman in desperate consultation with General Douglas MacArthur, whose control of the ground war in Korea has slipped disastrously away. MacArthur recognizes a stark reality: The U.S. military has been cut to the bone after victory over the Nazis—while China and the USSR have built up their forces. The only way to stop the Communist surge into the Korean Peninsula and save thousands of American lives is through a nuclear attack. MacArthur advocates a strike on Chinese targets in Manchuria. In actual history, Truman rejected his general’s advice; here, he does not. The miscalculation turns into a disaster when Truman fails to foresee Russia’s reaction. Almost instantly, Stalin strikes U.S. allies in Europe and Great Britain. As the shock waves settle, the two superpowers are caught in a horrifying face-off. Will they attack each other directly with nuclear weapons? What countries will be caught in between? The fateful global drama plays out through the experiences of ordinary people—from a British barmaid to a Ukrainian war veteran to a desperate American soldier alone behind enemy lines in Korea. For them, as well as Truman, Mao, and Stalin, the whole world has become a battleground. Strategic strikes lead to massive movements of ground troops. Cities are destroyed, economies ravaged. And on a planet under siege, the sounds and sights of nuclear bombs become a grim harbinger of a new reality: the struggle to survive man’s greatest madness. Praise for Bombs Away “A fascinating and compelling story of real people caught in forces beyond their control . . . [Harry Turtledove is] the unrivaled monarch of alternate history.”—Analog “Turtledove is an undisputed centerpiece of the alternate-history genre, and now, to his already grand display, he’s adding the ambitious tale of a WWII that could have happened.”—Booklist “This is Turtledove at his best.”—SFRevu “Alternate-world warrior extraordinaire Turtledove delivers the opening barrage of a new speculative conflict.”—Kirkus Reviews If your dog has cancer, you need this book. Dr. Susan Ettinger, DVM is a veterinary oncologist and a diplomate of the American College of Internal Medicine who practices in New York. Praise from Veterinarians, Authors & Book Reviewers "The future is upon us and this ground-breaking book is a vital cornerstone. In dealing with cancer, our worst illness, this Survival Guide is educational, logical, expansive, embracing, honest and so needed." Dr. Marty Goldstein, DVM Holistic veterinarian and Host, Ask Martha Stewart's Vet on Sirius Radio "The message of this book jumps off the written page and into the heart of every reader, and will become the at home bible for cancer care of dogs. The authors have given you a sensible and systematic approach that practicing veterinarians will cherish. I found the book inspiring and, clearly, it will become part of my daily approach to cancer therapy for my own patients." Dr. Robert B. Cohen, VMD Bay Street Animal Hospital, New York "I wish that I had had The Dog Cancer Survival Guide when my dearly beloved Flat-coated Retriever, Odin, contracted cancer. It would have provided me alternative courses of action, as well as some well needed "reality checks" which were not available from conversations with my veterinarian. It should be on every dog owner's book shelf--just in case..." Dr. Stanley Coren, PhD, FRSC author of many books, including Born to Bark "A comprehensive guide that distills both alternative and allopathic cancer treatments in dogs...With the overwhelming amount of conflicting information about cancer prevention and treatment, this book provides a pet owner with an easy to follow approach to one of the most serious diseases in animals." Dr. Barbara Royal, DVM The Royal Treatment Veterinary Center, Oprah Winfrey's Chicago veterinarian "Picking up The Dog Cancer Survival Guide is anything but a downer: it's an 'empowerer.' It will make you feel like the best medical advocate for your dog. It covers canine cancer topics to an unprecedented depth and breadth from emotional coping strategies to prevention-in plain English.Read this book, and you will understand cancer stages, treatment options, and types, and much more. This is the ultimate cookbook that readers need to incorporate healthy eating knowledge into their daily practices. Student Solutions Manual to accompany Fundamentals of Physics 9th Edition by Halliday A young detective’s first case in Tennessee puts her on the path of a gruesome serial killer in the New York Times bestselling author’s romantic thriller. One by one, they will die. He has waited patiently, envisioning their final moments. Their tortured screams, their pleas for mercy—all will be in vain as he executes his sadistic plan. Homicide detective Julia Cass has witnessed

plenty of crime scenes. But the murder of a Chattanooga judge is shocking in its brutality. Teamed with FBI agent Will Brannock, Julia delves into an investigation that soon unearths more bodies—all mutilated in the same way, all left with a gruesome souvenir of a killer's ruthless rage . . . The only way to stop the slaughter is to predict the next victim. But when you're dealing with vengeance at its most ruthless, one wrong move can make you a target . . . and the next word you utter could be your last . . . Proteins are the functional units of the cellular machinery and they provide significant information regarding the molecular basis of health and disease. Therefore, techniques to separate and isolate the various proteins are critical to studying and understanding their functional characteristics. One of the widely used techniques for this purpose is electrophoresis. In *Protein Electrophoresis: Methods and Protocols*, contributions from experts in the field have been collected in order to provide practical guidelines to this complex study. Each chapter outlines a specific electrophoretic variant in detail so that laboratory scientists may perform a technique new to their lab without difficulty. Written in the successful *Methods in Molecular Biology*™ series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and accessible, *Protein Electrophoresis: Methods and Protocols* seeks to serve laboratory scientists with well-honed, detailed methodologies in an effort to further our knowledge of this essential field. This book showcases state-of-the-art research and innovations in communications technologies for connected smart cities. The interfaces of various communication technologies are explored, alongside design-specific issues for the integration of different architectural components, and the interoperability of various solutions. A kind and humble shoemaker called Simon goes out one day to purchase sheep-skins in order to sew a winter coat for his wife and himself to share. Usually the little money, which Simon earned would be spent to feed his wife and children. Simon decided that in order to afford the skins he must go on a collection to receive the five roubles and twenty kopeks owed to him by his customers. As he heads out to collect the money he also borrows a three-rouble note from his wife's money box. While going on his collection he only manages to receive twenty kopeks rather than the full amount. Feeling disheartened by this Simon rashly spends the twenty kopeks on vodka and starts to head back home. On his way home he rants to himself about the little he can do with twenty kopeks besides spend it on alcohol and that the winter cold is bearable without a sheep-skin coat. While approaching a holy shrine, Simon stops and notices something pale looking leaning against it. He peers harder and distinguishes that it is a naked man who appears poor of health. At first he is suspicious and fears that the man has no good intentions if he is left in such a state. He proceeds to pass the man until he feels that for a second the man lifted his head and looked toward him. Simon debates what to do in his mind and feels shameful for his disregard and heads back to help the man. In the summer of 1995, lifelong saltwater fisherman Sid Dobrin accepted a job in the Midwest, taking him far away from the saltwater fishing world that had become a substantial part of his life. The two years he spent away from the ocean gave him the necessary perspective to reflect upon the lure of saltwater fishing familiar to anglers of all types and abilities - the taste of the sea's salty spray while casting into the surf at sunrise; the calm, quiet drift of a boat on one's home water; the sudden tug of a battling fish on the end of a line. The result is this beautifully crafted collection of evocative, entertaining, often funny essays on a range of topics guaranteed to appeal to anyone who has ever cast a line into the sea in pursuit of wild gamefish. Dobrin takes the reader through the sometimes tangled role fathers play in the maturing of a young fisherman; the sanctity and security of fishing one's favorite waters; the special relationships between comfortable fishing partners; the pleasures and pitfalls of drinking and fishing; the mysteries of fly fishing; and much more. Steelhead flies represent the highest echelon of artistic fly-dressing. They enjoy a rich tradition as both a functionally designed lure for tempting the much-revered steelhead, but also as a creative expression of the aesthetic appeal of fly angling. John Shewey, author of the acclaimed *Spey Flies & Dee Flies*, has produced another well-written and researched book, rich in technique, method and innovation. Through concise text and hundreds of sharp, color photographs--including step-by-step and artistic individual fly plates--Shewey covers: materials for steelhead flies; basic tying techniques; hairwing and featherwing flies; Spey and Dee styles; Practitioners, shrimp and prawn patterns; dry flies and much more. This book is a must-have for all steelhead fly-fishermen. *Vibration Problems in Machines* explains how to infer information about the internal operations of rotating machines from external measurements through methods used to resolve practical plant problems. Second edition includes summary of instrumentation, methods for establishing machine rundown data, relationship between the rundown curves and the ideal frequency response function. The section on balancing has been expanded and examples are given on the strategies for balancing a rotor with a bend, with new section on instabilities. It includes case studies with real plant data, MATLAB® scripts and functions for the modelling and analysis of rotating machines. The adventures of Chupacabra Charlie and his human friend in their first exciting adventure together. *Prevention* magazine provides smart ways to live well with info and tips from experts on weight loss, fitness, health, nutrition, recipes, anti-aging & diets. This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology. In *Extra Lives*, acclaimed writer and life-long video game enthusiast Tom Bissell takes the reader on an insightful and entertaining tour of the art and meaning of video games. In just a few decades, video games have grown increasingly complex and sophisticated, and the companies that produce them are now among the most profitable in the entertainment industry. Yet few outside this world have thought deeply about how these games work, why they are so appealing, and what they are capable of artistically. Blending memoir, criticism, and first-rate reportage, *Extra Lives* is a milestone work about what might be the dominant popular art form of our time. The old lady on this train is looking at me, staring at me, she's been doing it since New Eltham, I can feel her eyes on the sweat on my neck.
