**Introduction and Basic Concepts of SAP Business Objects** Nov 06 2021 Having a quick introduction to programming techniques with the aid of real-world examples can help you advance your SAP abilities. In the IT sector, SAP Business Objects is a well-known and sophisticated programming language. This book is intended to assist you with using legacy structures and knowing the proper approaches. You may anticipate learning several methods for improving program performance utilizing a

number of performance analysis tools in the final chapters. You will possess the knowledge necessary to competently create maintainable programs in Systems, Applications, and Products by the conclusion of this book (SAP) Simply scroll to the top of the page and click the "BUY NOW" button to obtain your copy right away!

**Universe Design with SAP BusinessObjects BI** Feb 15 2020 Are you the master of your UNX universes? Written for design novices and experts alike, this comprehensive resource spans universe creation to universe publication. You'll learn to build single- and multisource data foundations and business layers and to convert UNV to UNX using the new Information Design Tool (as well as explore its important features and functionalities). Up to date for SAP BusinessObjects Business Intelligence 4.1, this book offers the step-by-step instructions and guiding screenshots you need to design universes for the world.

**Business Intelligence** May 20 2020 Business professionals who want to advance their careers need to have a strong understanding of how to utilize business intelligence. This new book provides a comprehensive introduction to the basic business and technical concepts they'll need to know. It integrates case studies that demonstrate how to apply the material. Business professionals will also find suggested further readings that will develop their knowledge and help them succeed.

*Measuring Data Quality for Ongoing Improvement* Feb 26 2021 The Data Quality Assessment Framework shows you how to measure and monitor data quality, ensuring quality over time. You'll start with general concepts of measurement and work your way through a detailed framework of more than three dozen measurement types related to five objective dimensions of quality: completeness, timeliness, consistency, validity, and integrity. Ongoing measurement, rather than one time activities will help your organization reach a new level of data quality. This plain-language approach to measuring data can be understood by both business and IT and provides practical guidance on how to apply the DQAF within any organization enabling you to prioritize measurements and effectively report on results. Strategies for using data measurement to govern and improve the quality of data and guidelines for applying the framework within a data asset are included. You'll come away able to prioritize which measurement types to implement, knowing where to place them in a data flow and how frequently to measure. Common conceptual models for defining and storing of data quality results for purposes of trend analysis are also included as well as generic business requirements for ongoing measuring and monitoring including calculations and comparisons that make the measurements meaningful and help understand trends and detect anomalies. Demonstrates how to leverage a technology independent data quality measurement framework for your specific business priorities and data quality challenges Enables discussions between business and IT with a non-technical vocabulary for data quality measurement Describes how to measure data quality on an ongoing basis with generic measurement types that can be applied to any situation

*SAP Predictive Analytics* Sep 16 2022 Leave your crystal ball behind and peer into the future with SAP Predictive Analytics!

Master predictive models--regression, time series forecasting, clustering, and more--and learn how to get SAP Predictive Analytics up and running. Discover the essential tools, from Predictive Factory and the Automated Modeler to the Data Manager and Social Network Analysis. Get predictive analysis working for you! Highlights include: Predictive models Classification models Regression models Time-series forecasting models Predictive Factory Automated Analytics Expert Analytics Social Network Analysis (SNA) Data Manager Installation Integration

**Creating Documents with Business Objects XI-CBT** Jul 14 2022 This is a very powerful combination of the very successful Web Intelligence XI book and a Computer-Based Training (CBT) CD. The author has tried to make this CBT resemble his very effective training classes on Web Intelligence. After completing the CBT a student should be especially comfortable creating powerful and professional Business Objects reports and documents.

Wisdom Web of Things Oct 13 2019 This book provides a thorough overview of the Wisdom Web of Things (W2T), a holistic framework for computing and intelligence in an emerging hyper-world with a social-cyber-physical space. Fast-evolving Web intelligence research and development initiatives are now moving toward understanding the multifaceted nature of intelligence and incorporating it at the Web scale in a ubiquitous environment with data, connection and service explosion. The book focuses on the framework and methodology of W2T, as well as its applications in different problem domains, such as intelligent businesses, urban computing, social computing, brain informatics and healthcare. From the researcher and developer perspectives, the book takes a systematic, structured view of various W2T facets and their overall contribution to the development of W2T as a whole. Written by leading international researchers, this book is an essential reference for researchers, educators, professionals, and tertiary HDR students working on the World Wide Web, ubiquitous computing, knowledge management, and business intelligence.

**Advances in Web Intelligence** Aug 23 2020 We are pleased to present the proceedings of the 2003 Atlantic Web Intelligence Conference, AWIC 2003. The conference was located in Madrid, Spain during May 5–6, 2003, organized locally by the Technical University of Madrid. AWIC 2003 aimed to be the first of a series of conferences on Web Intelligence, to be celebrated annually, alternatively in Europe and America, starting in Madrid. It was born as an activity of the recently created WIC-Poland Research Centre and the WIC-Spain Research Centre, both belonging to the Web Intelligence Consortium (WIC) (<http://wi-consortium.org>). AWIC 2003 was supported with grants from the Spanish Ministry for Science and Technology and the European Network of Excellence in Knowledge Discovery, KNet. AWIC 2003 brought together scientists, engineers, computer users, and students to exchange and share their experiences, new ideas, and research results about all aspects (theory, applications, and tools) of artificial intelligence techniques applied to Web-based systems, and to discuss the practical

challenges encountered and the solutions adopted. Almost 70 contributions were submitted. After a preliminary evaluation, 60 of these papers were accepted to the conference and were assigned at least two reviewers from the international program committee. Out of this 60, 33 were conditionally accepted, and 32 of them were finally accepted after the conditions set by the reviewers had been met, which resulted in an acceptance ratio of 45%.

*Business Intelligence Roadmap* Apr 11 2022 This software will enable the user to learn about business intelligence roadmap.

**SAP BusinessObjects Dashboards 4.1 Cookbook** Jun 13 2022 If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced user of SAP BusinessObjects Dashboards, then this is the perfect book for you. Prerequisites include a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices.

**Effective Business Intelligence Systems** Oct 25 2020 Unlike Torts and Contracts, in which the facts are relatively consistent, cases that arise under the Constitution spring from a vast array of activities and appear to have little or no common thread.

Oracle Data Warehousing and Business Intelligence Solutions Oct 05 2021 Up-to-date, comprehensive coverage of the Oracle database and business intelligence tools Written by a team of Oracle insiders, this authoritative book provides you with the most current coverage of the Oracle data warehousing platform as well as the full suite of business intelligence tools. You'll learn how to leverage Oracle features and how those features can be used to provide solutions to a variety of needs and demands. Plus, you'll get valuable tips and insight based on the authors' real-world experiences and their own implementations. Avoid many common pitfalls while learning best practices for: Leveraging Oracle technologies to design, build, and manage data warehouses Integrating specific database and business intelligence solutions from other vendors Using the new suite of Oracle business intelligence tools to analyze data for marketing, sales, and more Handling typical data warehouse performance challenges Uncovering initiatives by your business community, security business sponsorship, project staffing, and managing risk

**Data Management Solutions Using SAS Hash Table Operations** Aug 03 2021 Hash tables can do a lot more than you might think! *Data Management Solutions Using SAS Hash Table Operations: A Business Intelligence Case Study* concentrates on solving your challenging data management and analysis problems via the power of the SAS hash object, whose environment and tools make it possible to create complete dynamic solutions. To this end, this book provides an in-depth overview of the hash table as an in-memory database with the CRUD (Create, Retrieve, Update, Delete) cycle rendered by the hash object tools. By using this concept and focusing on real-world problems exemplified by sports data sets and statistics, this book seeks to help you take advantage of the hash object productively, in particular, but not limited to, the following tasks: select proper hash tools to perform hash table operations use proper hash table operations to support specific data management tasks use the dynamic, run-

time nature of hash object programming understand the algorithmic principles behind hash table data look-up, retrieval, and aggregation learn how to perform data aggregation, for which the hash object is exceptionally well suited manage the hash table memory footprint, especially when processing big data use hash object techniques for other data processing tasks, such as filtering, combining, splitting, sorting, and unduplicating. Using this book, you will be able to answer your toughest questions quickly and in the most efficient way possible!

**Business Objects: The Complete Reference** Nov 18 2022 If your objective in business intelligence reporting is Business Objects success, this is the resource for you. Gives a thorough run-down of the software, plus coverage of Web intelligence, complex queries, multidimensional analysis, and more. Author Cindi Howson has plenty of hands-on experience with the product.

*SAP Businessobjects Web Intelligence* Feb 09 2022 Sharpen your data presentations with this comprehensive guide to SAP BusinessObjects Web Intelligence. From creating a report, to displaying data via charts, to sharing reports with others, get everything from the basics to the actionable details that inform your work. This third edition of our best-selling book on WebI includes UI and functionality changes for SAP BusinessObjects 4.1 and expanded coverage of new topics like SAP HANA and mobility. Make your reporting and analysis intelligent Web Intelligence 4.1 Flex your sales analysis and reporting muscles with usability improvements, new language support, and enhanced workflows for SAP HANA and BW data sources with the newest version of WebI. From Creation to Publication Get the complete picture of working with WebI. From the first steps to the last, learn how to design reports that make an impact. Mobile Integration Explore the new features of SAP BusinessObjects Mobile 5.x and learn how you can provide advanced analytics on mobile devices. Highlights: Release 4.1 HTML and Java viewers SAP HANA variable support Report creation Report Panel Data filters Drill-down Query Panel functionality BI Launch Pad Enhanced BI Mobile features Web Intelligence Rich Client

**Creating Documents with Business Objects** Dec 19 2022 Book & CD. The "Web Intelligence Course" is a very comprehensive course that teaches users how to use the Web Intelligence environment and the Java Report Panel. First, the book is designed to instruct users how to work with documents: saving, sharing, refreshing, and so forth, allowing students that simply want to work with stored documents to finish early. The next sections explain how to use the Java Report Panel to create powerful Business Objects Reports.

*Advances in Web Intelligence* Jan 08 2022 In recent years the Internet has become a source of data and information of indisputable importance and has immensely gained in acceptance and popularity. The World Wide Web (WWW or Web, for short), frequently named "the nervous system of the information society," offers numerous valuable services leaving no doubt

about the significance of the Web in our daily activities at work and at home. Consequently, we have a clear aspiration to meet the obvious need for effective use of its potential by making improvements in both the methods and the technology applied. Among the new research directions observable in Web-related applications, intelligent methods from within the broadly perceived topic of soft computing occupy an important place. AWIC, the “Atlantic Web Intelligence Conferences” are intended to be a forum for exchange of new ideas and novel practical solutions in this new and exciting field. The conference was born as an initiative of the WIC-Poland and the WIC-Spain Research Centres, both belonging to the Web Intelligence Consortium – WIC (<http://wi-consortium.org/>). So far, three AWIC conferences have been held: in Madrid, Spain (2003), in Cancun, Mexico (2004), and in Łódź, Poland (2005).

SAP Business Intelligence Quick Start Guide Nov 25 2020 The SAP BusinessObjects Business Intelligence platform is a powerful reporting and analysis tool. This book is the ideal introduction to the SAP BusinessObjects Business Intelligence platform, introducing you to its data visualization, visual analytics, reporting, and dashboarding capabilities.

**Business Intelligence for Enterprise Internet of Things** Jan 16 2020 This book discusses Internet of Things (IoT) as it relates to enterprise applications, systems, and infrastructures. The authors discuss IoT and how it’s disrupting industries such as enterprise manufacturing, enterprise transportation, enterprise smart market, enterprise utilities, and enterprise healthcare. They cover how IoT in the enterprise will have a major impact on the lives of consumers and professionals around the world and how it will change the way we think about professional and consumer networks. The book's topics include IoT enterprise system architecture, IoT enabling enterprise technologies, and IoT enterprise services and applications. Examples include enterprise on demand, market impacts, and implications on smart technologies, big data enterprise management, and future enterprise Internet design for various IoT use cases, such as share markets, healthcare, smart cities, smart environments, smart communications and smart homes.

**SAP Analysis for Microsoft Office--Practical Guide** Nov 13 2019 Managing your SAP data in Microsoft Excel? This is your guide to using SAP Analysis for Microsoft Office! Get started with the basics, from creating your first workbook to navigating through reports. Then, follow step-by-step instructions to process data, analyze data, develop planning applications, customize reports, and work with tools such as formulas and macros. Including details on troubleshooting, UI customization, and more, this book is your all-in-one resource! In this book, you'll learn about: a. Reporting and Data Analysis Learn to work with reports in SAP Analysis for Microsoft Office: define parameters with prompts, adjust formatting and styles, and extend reports with local data. Filter, sort, and display your data using hierarchies, and refine data analysis with simple and advanced calculations. b. Planning Use your SAP data to develop planning workbooks. Plan your data both manually and with functions and sequences.

Understand key settings for cell locking, the planning model, and more. c. Advanced Features Take your skills to the next level. Write formulas to use in your reports, and create and use macros in your workbooks, including steps to use API methods, callbacks, and design rules. Highlights include: 1) Workbook creation 2) Report navigation 3) Prompts 4) Data processing, organization, and analysis 5) Planning applications 6) Report customization and formatting 7) Formulas 8) Macros 9) Configuration 10) Troubleshooting

**SAP BusinessObjects BI System Administration** Jul 02 2021 As a system administrator, you know that users like to keep you on your toes. Don't worry You can stay one step ahead with this guide to BOBJ administration. From sizing to troubleshooting, get the background you need to administer a system that does what it's supposed to do. Revised for release 4.1 and offering new coverage of Design Studio and Lumira, this book will help you keep your system up to snuff. Highlights: Sizing and scalability Patches and upgrades Central Management Server Central Management Console Promotion Management and UMT Troubleshooting and maintenance SAP BusinessObjects Mobile Cryptography and rights Auditor User and content management Software Development Kit

Emergent Web Intelligence: Advanced Information Retrieval Jul 22 2020 This volume reviews cutting-edge technologies and insights related to XML-based and multimedia information access and data retrieval. And by applying new techniques to real-world scenarios, it details how organizations can gain competitive advantages.

**Advances in Web Intelligence** Sep 23 2020 This book constitutes the refereed proceedings of the Third International Atlantic Web Intelligence Conference, AWIC 2005, held in Lodz, Poland in June 2005. The 74 revised papers presented together with abstracts of 4 invited papers were carefully reviewed and selected from 140 submissions. All current aspects Web intelligence are addressed including semantic Web issues, ambient intelligence, intelligent information services, Web search, distributed service management, clustering, visualization, data mining, description logics, ontologies, Web query processing, categorization, classification, Web services, e-learning, and knowledge discovery.

SAP NetWeaver BW and SAP BusinessObjects Sep 04 2021 Finally-the entire SAP BI world comes in one volume! This comprehensive guide covers the full spectrum of SAP solutions for business intelligence: both SAP NetWeaver and SAP BusinessObjects. In this all-encompassing reference, you will learn everything you need to know regarding data modeling and retrieval, optimal use of reporting tools from SAP (BEx and BusinessObjects), and the essential differences and recent changes between SAP BW 3.x and SAP NetWeaver BW 7.3. This is the ultimate resource that you will consult over and over again, with essential information for SAP consultants, IT staff, DB managers, and end-users. Highlights: - BI in the enterprise - Data modeling - ETL - Administration - Permissions - SAP Business Explorer - SAP BusinessObjects Analysis - SAP Crystal

Reports - SAP BusinessObjects Dashboards (formerly Xcelsius) - SAP BusinessObjects Web Intelligence - SAP BusinessObjects Explorer - SAP BusinessObjects BI platform - BW integrated planning - SAP SEM-BCS - BusinessObjects XI (Release 2): The Complete Reference Jun 01 2021 This book is a must read for anyone deploying BusinessObjects. It covers everything from planning your upgrade to the latest release, to best practices in universe design, and powerful report creation that maximizes business insight. This book covers the most frequently used features for the full BI suite, in one comprehensive book. There's in depth coverage of Designer, security via the Central Management Console, InfoView, Web Intelligence, and Desktop Intelligence. It goes beyond step-by-step instructions to cover how and why in a business context. Transition notes are interspersed for version 5 and 6 customers to understand the biggest changes in XI Release 2. If you drive BI requirements in your company or are a data warehouse program manager, Business Objects administrator, report author or consumer, this book is for you.

**Web Intelligence** Mar 30 2021 This excellently written monograph provides – for the first time ever - a thorough introduction and systematic overview of all aspects of intelligent data processing on the Web. It presents both the current state of research as well as application aspects. All major topics related to Web Intelligence which can have impact on future directions and developments are presented in detail. This book will be a valuable source of reference for years to all research and development professionals interested in Web Intelligence. Students will also appreciate the numerous illustrations and examples.

**SAP BusinessObjects BI 4.0 The Complete Reference 3/E** Feb 21 2023 The definitive reference for building actionable business intelligence—completely revised for SAP BusinessObjects BI 4.0. Unleash the full potential of business intelligence with fact-based decisions, aligned to business goals, using reports and dashboards that lead from insight to action. SAP BusinessObjects BI 4.0: The Complete Reference offers completely updated coverage of the latest BI platform. Find out how to work with the new Information Design Tool to create universes that access multiple data sources and SAP BW. See how to translate complex business questions into highly efficient Web Intelligence queries and publish your results to the BI Launchpad. Learn how to create dashboards from data sourced through a universe or spreadsheet. The most important concepts for universe designers, report and dashboard authors, and business analysts are fully explained and illustrated by screenshots, diagrams, and step-by-step instructions. Establish and evolve BI goals Maximize your BI investments by offering the right module to the right user Create robust universes with the Information Design Tool, leveraging multiple data sources, derived tables, aggregate awareness, and parameters Develop a security plan that is scalable and flexible Design Web Intelligence reports from basic to advanced Create sophisticated calculations and advanced formatting to highlight critical business trends Build powerful dashboards to embed in PowerPoint or the BI Launchpad Use Explorer to visually navigate large data sets and

uncover patterns

*Fewer, Better Things* Mar 18 2020 From the former director of the Museum of Arts and Design in New York, a timely and passionate case for the role of the well-designed object in the digital age. Curator and scholar Glenn Adamson opens *Fewer, Better Things* by contrasting his beloved childhood teddy bear to the smartphones and digital tablets children have today. He laments that many children and adults are losing touch with the material objects that have nurtured human development for thousands of years. The objects are still here, but we seem to care less and know less about them. In his presentations to groups, he often asks an audience member what he or she knows about the chair the person is sitting in. Few people know much more than whether it's made of wood, plastic, or metal. If we know little about how things are made, it's hard to remain connected to the world around us. *Fewer, Better Things* explores the history of craft in its many forms, explaining how raw materials, tools, design, and technique come together to produce beauty and utility in handmade or manufactured items. Whether describing the implements used in a traditional Japanese tea ceremony, the use of woodworking tools, or the use of new fabrication technologies, Adamson writes expertly and lovingly about the aesthetics of objects, and the care and attention that goes into producing them. Reading this wise and elegant book is a truly transformative experience.

*Mathematics for Machine Learning* Dec 15 2019 The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding.

Programming tutorials are offered on the book's web site.

**SAP BusinessObjects Reporting Cookbook** Oct 17 2022 If you are a business analyst, BI developer, or an IT professional who wants to learn the A to Z of how to work with Web Intelligence reporting tools and different types of data, then this book is for you. The only thing you need is a basic understanding of what Business Intelligence is and data concepts.

SAP BusinessObjects BI Security Jun 20 2020 How secure is your SAP BusinessObjects environment? Find out with this book, which will shore up your understanding of the basic concepts involved in securing data and teach you the practical, technical

steps you'll need. Explore the frameworks, properties, and data sources of the SAP BusinessObjects suite. Up to date for release 4.0 FP3 and applicable to earlier releases, this comprehensive guide is the key to locking down your system.

*Decision Support Systems for Business Intelligence* Dec 07 2021 Praise for the First Edition "This is the most usable decision support systems text. [i]t is far better than any other text in the field" —ComputingReviews Computer-based systems known as decision support systems (DSS) play a vital role in helping professionals across various fields of practice understand what information is needed, when it is needed, and in what form in order to make smart and valuable business decisions. Providing a unique combination of theory, applications, and technology, *Decision Support Systems for Business Intelligence, Second Edition* supplies readers with the hands-on approach that is needed to understand the implications of theory to DSS design as well as the skills needed to construct a DSS. This new edition reflects numerous advances in the field as well as the latest related technological developments. By addressing all topics on three levels—general theory, implications for DSS design, and code development—the author presents an integrated analysis of what every DSS designer needs to know. This Second Edition features: Expanded coverage of data mining with new examples Newly added discussion of business intelligence and transnational corporations Discussion of the increased capabilities of databases and the significant growth of user interfaces and models Emphasis on analytics to encourage DSS builders to utilize sufficient modeling support in their systems A thoroughly updated section on data warehousing including architecture, data adjustment, and data scrubbing Explanations and implications of DSS differences across cultures and the challenges associated with transnational systems Each chapter discusses various aspects of DSS that exist in real-world applications, and one main example of a DSS to facilitate car purchases is used throughout the entire book. Screenshots from JavaScript® and Adobe® ColdFusion are presented to demonstrate the use of popular software packages that carry out the discussed techniques, and a related Web site houses all of the book's figures along with demo versions of decision support packages, additional examples, and links to developments in the field. *Decision Support Systems for Business Intelligence, Second Edition* is an excellent book for courses on information systems, decision support systems, and data mining at the advanced undergraduate and graduate levels. It also serves as a practical reference for professionals working in the fields of business, statistics, engineering, and computer technology.

*Creating Documents with Business Objects* Aug 15 2022 Learn to create powerful web intelligence reports using tables, crosstabs, and charts. Throughout the text there are well-thought-out examples on how to use these report structures to effectively transform corporate data into information that your company can use. Data can be presented many different ways, ranging from boring to exciting. Learn how to use the analysis tools to create interactive analytical reports that can rival dashboards in both analytics and performance, usually with less development time than dashboards. Web intelligence offers

many powerful functions that can be used to create formulas that allow for highly effective analysis of corporate data. Discover how you can use these formulas to transform everyday numbers into useful decision-making tools. Corporate data can be very large and accessed through many different universes. Learn how to build efficient queries with custom query filters, subqueries, and database ranks. Also, learn how to create multiple query documents that take advantage of these many universes.

**Crystal Reports XI Official Guide** May 12 2022 The authorized guide to the latest edition of the #1 business intelligence software product - Crystal Reports. More than 16 million licenses of Crystal Reports have been shipped to date. This book is a reference designed to provide hands-on guidance for the latest release of the product suite. The latest version of Crystal Reports and the Business Objects enterprise reporting suite delivers vast product enhancements and a tighter integration that will drive upgrades from licensees. Brand new features (e.g. Dynamic and Cascading Parameter Generation) will also appeal to new audiences. Over 1 million new Business Intelligence licensees will be migrating to the Crystal Enterprise Reporting platform, as this is the first release of the software with the existing Business Objects (BO) products being integrated into the Crystal infrastructure. As Business Objects insiders, the authors bring unique and valuable real-world perspectives on implementations and uses of the Crystal Reports product. The book also includes content, tutorials and samples for reporting within the Microsoft Visual Studio.NET and J2EE development environments and also on top of the SAP Business Information Warehouse (BW) and the Peoplesoft platform. Advanced content on report distribution and integration into the secured managed reporting solution known as Business Objects Enterprise XI, is also now included in this definitive user guide with coverage on the new Web Services SDK.

Successful Business Intelligence: Secrets to Making BI a Killer App Dec 27 2020 Praise for Successful Business Intelligence "If you want to be an analytical competitor, you've got to go well beyond business intelligence technology. Cindi Howson has wrapped up the needed advice on technology, organization, strategy, and even culture in a neat package. It's required reading for quantitatively oriented strategists and the technologists who support them." --Thomas H. Davenport, President's Distinguished Professor, Babson College and co-author, *Competing on Analytics* "When used strategically, business intelligence can help companies transform their organization to be more agile, more competitive, and more profitable. Successful Business Intelligence offers valuable guidance for companies looking to embark upon their first BI project as well as those hoping to maximize their current deployments." --John Schwarz, CEO, Business Objects "A thoughtful, clearly written, and carefully researched examination of all facets of business intelligence that your organization needs to know to run its business more intelligently and exploit information to its fullest extent." --Wayne Eckerson, Director, TDWI Research "Using real-world examples, Cindi Howson shows you how to use business intelligence to improve the performance, and the quality, of your

company." --Bill Baker, Distinguished Engineer & GM, Business Intelligence Applications, Microsoft Corporation "This book outlines the key steps to make BI an integral part of your company's culture and demonstrates how your company can use BI as a competitive differentiator." --Robert VanHees, CFO, Corporate Express "Given the trend to expand the business analytics user base, organizations are faced with a number of challenges that affect the success rate of these projects. This insightful book provides practical advice on improving that success rate." --Dan Vesset, Vice President, Business Analytics Solution Research, IDC

SAP BusinessObjects Web Intelligence Jan 20 2023 Bring your data presentations into focus with this comprehensive guide to SAP BusinessObjects Web Intelligence. Updated for Webi 4.2, this book will teach you to create, design, and share your reports, while exploring the fundamentals of Webi and its extended capabilities. This fourth edition includes information on data source options for building new documents and queries, and a new HTML5-based viewing interface. Punch up your reporting and analysis a. SAP BI 4.2 SP4 Dive into Web Intelligence 4.2 enhancements and platform improvements, including a new HTML5 user interface, support for geomaps, and access to additional data sources. b. Webi from A to Z Get the complete picture of working with Web Intelligence, from creation to publication. From the first step to the last, learn how to design reports that make an impact with this comprehensive guide. c. Web Intelligence Interactive Viewer Discover the HTML5-based Web Intelligence Interactive Viewer and BI launchpad, a fully integrated interface for organizing, viewing, analyzing, and sharing business intelligence content.

**Advances in Web Intelligence** Apr 18 2020 This book constitutes the refereed proceedings of the Second International Web Intelligence Conference, AWIC 2004, held in Cancun, Mexico, in May 2004. The 22 revised full papers presented were carefully reviewed and selected from 52 submissions. The papers are organized in topical sections on collaborative filtering and recommendation, supporting Web communities, multi-agent systems, soft computing methods, text processing and semantic Web, Web information retrieval, and categorization and ranking.

*Business Intelligence* Jan 28 2021 This book constitutes the tutorial lectures of the 5th European Business Intelligence Summer School, eBISS 2015, held in Barcelona, Spain, in July 2015. The tutorials presented here in an extended and refined format were given by renowned experts and cover topics including schema evolution for databases and data warehouses, publishing OLAP cubes on the Semantic Web, design issues in social business intelligence projects, context-aware business intelligence, and key performance indicators in data warehouses.

**BusinessObjects XI (Release 2): The Complete Reference** Mar 10 2022 This book is a must read for anyone deploying BusinessObjects. It covers everything from planning your upgrade to the latest release, to best practices in universe design, and

powerful report creation that maximizes business insight. This book covers the most frequently used features for the full BI suite, in one comprehensive book. There's in depth coverage of Designer, security via the Central Management Console, InfoView, Web Intelligence, and Desktop Intelligence. It goes beyond step-by-step instructions to cover how and why in a business context. Transition notes are interspersed for version 5 and 6 customers to understand the biggest changes in XI Release 2. If you drive BI requirements in your company or are a data warehouse program manager, Business Objects administrator, report author or consumer, this book is for you.

Web Intelligence: Research and Development Apr 30 2021 This book constitutes the refereed proceedings of the First Asia-Pacific Conference on Web Intelligence, WI 2001, held in Maebashi City, Japan, in October 2001. The 28 revised full papers and 45 revised short papers presented were carefully reviewed and selected from 153 full-length paper submissions. Also included are an introductory survey and six invited presentations. The book offers topical sections on Web information systems environments and foundations, Web human-media engineering, Web information management, Web information retrieval, Web agents, Web mining and farming, and Web-based applications.
