This book provides information on the advances in blanching and its effect on food. The author presents the concepts involved in old and novel blanching processes, the typical effects of blanching and the studies on novel blanching technologies. New Perspectives on Virtual and Augmented Reality discusses the possibilities of using virtual and augmented reality in the role of innovative pedagogy, where there is an urgent need to find ways to teach and support learning in a transformed learning environment. Technology creates opportunities to learn differently and presents challenges for education. Virtual Reality solutions can be exciting, create interest in learning, make learning more accessible, and make learning faster. This book analyzes the capabilities of Virtual, Augmented and Mixed Reality by providing ideas on how to make learning more effective, how existing VR/AR solutions can be used as learning tools, and how a learning process can be structured. The VR solutions can be used successfully for educational purposes as their use can contribute to the construction of knowledge and the development of metacognitive processes. They also contribute to inclusive education by providing access to knowledge that would not otherwise be available. This book will be of great interest to academics, researchers, and post-graduate students in the field of educational technology. In today's world where technology impacts every aspect of life, you need to know how to evaluate devices, choose apps, maintain a professional online reputation, and ensure digital security. NEW PERSPECTIVES ON COMPUTER CONCEPTS 2018, COMPREHENSIVE offers the

insights to help. This book goes beyond the intuitive how-to of apps and social media to delve into broad concepts that are guiding current technologies such as self-driving cars, virtual reality, file sharing torrents, encrypted communications, photo forensics, and the Internet of Things. Numerous illustrations and interactive features make mastering technical topics a breeze, while the book's proven learning path is structured with today's busy reader in mind. This edition offers an insightful overview of what today's readers must know about using technology to complete an education, secure a successful career, and engage in issues that shape today's world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Offers an interdisciplinary approach to narrative perspective, with essays by leading scholars of literary studies, cognitive psychology, linguistics, philosophy, and film and media criticism. Thomas Robert Malthus (1766-1834) was a pioneer in demography, economics and social science more generally whose ideas prompted a new 'Malthusian' way of thinking about population and the poor. On the occasion of the two hundred and fiftieth anniversary of his birth, *New Perspectives on Malthus* offers an up-to-date collection of interdisciplinary essays from leading Malthus experts who reassess his work. Part one looks at Malthus's achievements in historical context, addressing not only perennial questions such as his attitude to the Poor Laws, but also new topics including his response to environmental themes and his use of information about the New World. Part two then looks at the complex reception of his ideas by writers, scientists, politicians and philanthropists from the period of his own lifetime to the present day, from Charles Darwin and H. G. Wells to David Attenborough, Al Gore and Amartya Sen. "This book provides a useful round-up of studies that help the reader understand what constitutes bullying (a much-debated point), the characteristics of bullies and children who are targeted, patterns of behaviour and common

outcomes for the children involved, as well as what inhibits many schools from formulating effective policy." Children & Young People Now What is bullying? What can we learn from research findings? What are the risk factors for bullying or being bullied? How can we take account of the voice of the child? How can educators, policy-makers, health professionals and parents work together with children and young people to prevent and reduce bullying? This book provides a valuable resource for anyone responsible for the emotional health and well-being of children and young people. The authors focus on the importance of fostering positive relationships in the school community as a whole, so that young people and adults feel empowered to challenge bullying when they encounter it and protect those involved. Using case studies of real experiences, innovative practice, key research findings and perspectives from children and young people themselves, the authors provide perceptive insights into the positive ways of relating to others that are essential if we are to address the issue of bullying successfully. The material outlined in the book is directly linked to the new agenda for change in meeting the needs of the child, empowering children to be consulted and to take responsibility for issues that affect them. It explores a range of effective interventions that can counteract bullying - including restorative approaches; peer mediation; narrative approaches; and cyber support. Key features include: Chapter overviews Examples of effective practice Summaries of key research findings Children's views and experiences Learning points at the end of each chapter List of related organisations, websites and resources to support interventions against bullying Practical guidance based on sound evaluation is provided - as well as an insight into international perspectives on bullying - to help develop a positive school environment and disseminate good practice. New Perspectives on Bullying is an indispensable resource for teachers, researchers, health professionals, social workers and parents. This volume, the

result of an advanced seminar at the School of American Research, takes a fresh look at Pueblo Indian culture, with chapters on everything from language to religion, prehistory, ecology, and from literature to music. Alfonso Ortiz molded the work of a diverse set of contributors into a cohesive and comprehensive examination that is informative and enjoyable to the scholarly and lay reader alike. The results show that evidence for the diversity of origin for prehistoric Pueblo cultures seems greater than ever. This book brings together a collection of emergent research that moves the debate on desistance beyond a general consideration of individual and social structural influences. The authors examine empirical developments which have implications for policy surrounding resettlement and re-offending, but also for punishment practices. Presenting thought-provoking theoretical advances and critiques, the editors challenge and enrich traditional understandings of desistance. A wide range of chapters explore how some criminal justice interventions hinder the desistance process, but also how alternative approaches may be more helpful in promoting and supporting desistance. Thorough and diverse, this book will be of great interest to scholars of criminology and criminal justice, social policy, sociology and psychology, and of special interest to researchers and practitioners working with (ex-)offenders. Now available in paperback, *Vitamin Ph* is a global, up-to-the-minute survey of new developments in contemporary photography, featuring the work of 121 living photographers who have made a fresh and innovative contribution to international art photography. Texts by significant critics, curators, art historians and creative writers representing a wide variety of perspectives comprise a book that is both a reference for the art world and an accessible guide for those with an interest in photography. *NEW PERSPECTIVES ON THE INTERNET* has been updated to cover the newest releases of the three main web browsers including Internet Explorer 9, Mozilla Firefox 4, and Google Chrome. With

the New Perspectives critical-thinking, problem-solving approach, students will learn basic to advanced features of the Internet from Browser Basics to Electronic Commerce. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. As China's role and influence throughout the world continues to grow, understanding this evolution becomes ever more important. This book is dedicated to exploring new trends and themes in Chinese foreign policy, with the aim of adding new insights to the existing literature and opening up opportunities for further specialised research. The book is divided into three sections: National, touching on issues within China and its periphery; Transnational, looking at how concepts and people influence power; and finally, International, examining China's interactions with the other regions and nations. The chapters work together to offer a sweeping overview of a multitude of new perspectives on China's interactions and activities throughout the world. Contributors Ilaria Carrozza, Benjamin Creutzfeldt, Nori Katagiri, Neville Chi Hang Li, Tony Tai-Ting Liu, Gustav Sundqvist, Casper Wits, Shu Liang (Karl) Yan and Claudia Zanardi

In his seminal article "Freedom Then, Freedom Now," renowned civil rights historian Steven F. Lawson described his vision for the future study of the civil rights movement. Lawson called for a deeper examination of the social, economic, and political factors that influenced the movement's development and growth. He urged his fellow scholars to connect the "local with the national, the political with the social," and to investigate the ideological origins of the civil rights movement, its internal dynamics, the role of women, and the significance of gender and sexuality. In *Freedom Rights: New Perspectives on the Civil Rights Movement*, editors Danielle L. McGuire and John Dittmer follow Lawson's example, bringing together the best new scholarship on the modern civil rights movement. The work expands our understanding of the movement by engaging issues of local and national politics,

gender and race relations, family, community, and sexuality. The volume addresses cultural, legal, and social developments and also investigates the roots of the movement. Each essay highlights important moments in the history of the struggle, from the impact of the Young Women's Christian Association on integration to the use of the arts as a form of activism. Freedom Rights not only answers Lawson's call for a more dynamic, interactive history of the civil rights movement, but it also helps redefine the field. Leading author, Gerry Gutek, discusses the major philosophical systems and then applies how these systems and ideologies contribute to educational theory. Examines the origin, meaning and relevance to teaching and learning. New Perspectives on Philosophy and Education is organized into three major parts: philosophies, ideologies, and theories of education. Part I examines philosophy and education, idealism, realism, pragmatism, existentialism and postmodernism and analyzes their educational implications; Part II examines Ideology, Nationalism, Liberalism, Conservatism, and Marxism and analyzes their educational implications; Part III deals with theory, Essentialism, Progressivism, Social Reconstructionism, Critical Theory, and Globalization in terms of their meaning for education. In drawing out the educational implications of these philosophies, ideologies, and theories, the author places them in the context of education, schooling, curriculum, and instruction. Pedagogical aspects include discussion questions, topics for reflection and research, websites, and suggested readings. This monograph integrates theoretical perspectives on affect and learning with recent research in affective computing with an emphasis on building new learning technologies. The "new perspectives" come from the intersection of several research themes: -□Basic research on emotion, cognition, and motivation applied to learning environments -□Pedagogical and motivational strategies that are sensitive to affective and cognitive processes -□Multimodal Human Computer Interfaces, with a focus on affect recognition

and synthesis -□Recent advances in affect-sensitive Intelligent Tutoring Systems -□Novel methodologies to investigate affect and learning -□Neuroscience research on emotions and learning This book address fundamental questions of human development, revisiting old questions and applying original empirical findings. In *New Perspectives on the Irish Diaspora*, Charles Fanning incorporates eighteen fresh perspectives on the Irish diaspora over three centuries and around the globe. He enlists scholarly tools from the disciplines of history, sociology, literary criticism, folklore, and culture studies to present a collection of writings about the Irish diaspora of great variety and depth. 'Affective Learning Together' contains in-depth theoretical reviews and case studies in the classroom, of the social and affective dimensions of group learning in a variety of educational situations and taught disciplines, from small groups working on design projects or debating topics in biology and in history in schools. This book argues that many mental states, including such conscious states as perceptual experiences and bodily sensations, are identical with brain states. *New Perspectives on Education for Democracy* brings together diverse communities of education research in an innovative way to develop a nuanced understanding of the relationship between education and democracy. This book synthesises a range of theoretical, conceptual, and empirical approaches to address the complex challenges faced by young people and societies in the 21st century. Each chapter provides accounts of local democratic encounters in education, while engaging with global debates and issues, such as de-democratisation and growing social, economic, and educational inequality. This book presents new ways of thinking about democracy, local-global enactments of democracy through teaching and learning, and future thinking for a new era of democracy. This book will be relevant for educators, researchers, and policymakers who are interested in educational sociology, critical pedagogy, and democratic education. Go beyond

computing basics with the award-winning NEW PERSPECTIVES ON COMPUTER CONCEPTS. Designed to get you up-to-speed on essential computer literacy skills, this market leading text goes deeper, providing technical and practical information relevant to everyday life. NEW PERSPECTIVES ON COMPUTER CONCEPTS 2014 incorporates significant technology trends that affect computing and everyday life; such as concerns for data security, personal privacy, online safety, controversy over digital rights management, interest in open source software and portable applications, and more. In addition, coverage of Microsoft Windows 8 and Office 2013 will introduce you to the exciting new features of Microsoft's next generation of software. 'Extremely useful background reading for pre- and in service teachers especially, but not only, of pre-adults.' -The Teacher Trainer

'There are no muddled thoughts or fudging of issues here; Rigby deals head on with difficult issues, and the book has a nice literary style that is a pleasure to read - an ambitious and creditable achievement, with many excellent sections that break new ground while remaining equally accessible to practitioners and researchers.' - Educational Research

'This book is written in a lively style, and is comprehensive.' - Professional Social Work

'Ken Rigby's important book, New Perspectives on Bullying, is a useful drawing together of a range of research on bullying and should prove a good general reference point.' - Cambridge Journal of Education

'Anyone developing a policy on dealing with bullying should read this book.' - Prime Focus

'Rigby's book is a fantastic reference source for anyone who is at all concerned with, or interested in, the issue of bullying. It could well serve as a springboard for a multitude of research projects. At the very least, the book will provide you with a summary of the very latest research on the subject.' - Prime Focus

'Written by Ken Rigby, this draws on the author's extensive research to examine how

bullying is being understood in different societies and offers critical appraisal of the suggested ways of tackling it. The author defines bullying as the systematic abuse of power, therefore making it a vital issue for society at large - not just schools but the workplace, prison and the home.' - Young People Now Magazine 'This book is an attempt to describe how the problem of bullying has been, and is being, conceptualised and understood; to explain what researchers and educators (and others) are saying about why there is so much bullying going on; and to examine what solutions are being canvassed... Bullying is a phenomenon one can literally find everywhere. It is time that our perspective on bullying extended further afield. In a way, this book is a testing of the water. It is the first book that has attempted to examine bullying comprehensively. If I am right in thinking that an examination of bullying as "the systematic abuse of power" is an issue that is of vital importance to society at large, then it should indeed be useful to consider bullying in a wide range of contexts: not only in schools, the workplace and prisons, but also and especially in the home, long the preserve of students of domestic violence.' - Ken Rigby, from the Preface This book takes as its subject matter bullying behaviour in a wide range of settings, including kindergartens, schools, the workplace, in sports and prisons. Examining bullying in each of these areas, it discusses alternative views and perspectives on bullying, helping policy makers and professionals to coordinate their work and so tackle the problem effectively. Dr Ken Rigby draws upon his extensive research into bullying in different countries, societies and social contexts and considers many aspects of victimisation within this broad perspective, including: * the defining characteristics of bullying * the harm that bullying does * the role of gender, race and culture * children's and adult's attitudes to, and perceptions of bullying * current views on methods of prevention and intervention This multi-faceted exploration will help to deepen understanding of bullying in its many

manifestations. It also provides practical and critical discussion of suggested ways of tackling bullying for professionals dealing with it in their field, providing valuable guidance in combating an ever-present problem. Readers develop the Microsoft Excel 2013 skills for academic and career success with this latest edition from the popular New Perspectives Series. Updated with all-new case-based tutorials, **NEW PERSPECTIVES MICROSOFT EXCEL 2013, COMPREHENSIVE ENHANCED EDITION** continues to apply MS Excel 2013 skills to real situations that fully demonstrate the relevance of concepts. A proven learning approach emphasizes critical thinking, problem-solving, and in-depth coverage. A new Troubleshoot case problem enhances analytical skills, while a new tutorial on Managing Your Files helps readers navigate Windows 8. Readers discover success with MS Excel 2013 as **NEW PERSPECTIVES MICROSOFT EXCEL 2013** emphasizes the value and application of what they are learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Women make up the vast majority of activists and organizers of grassroots movements fighting against environmental ills that threaten poor and people of color communities. [This] collection of essays ... pays tribute to the ... contributions women have made in these endeavors. The writers offer varied examples of environmental justice issues such as children's environmental-health campaigns, cancer research, AIDS/HIV activism, the Environmental Genome Project, and popular culture, among many others. Each one focuses on gender and sexuality as crucial factors in women's or gay men's activism and applies environmental justice principles to related struggles for sexual justice. Drawing on a wide variety of disciplinary perspectives, the contributors offer multiple vantage points on gender, sexuality, and activism.

-Back cover. This handbook is vital for understanding the origin of deep-water sandstones, emphasizing sandy-mass transport deposits (SMTDs) and bottom-current

reworked sands (BCRSs) in petroleum reservoirs. This cutting-edge perspective, a pragmatic alternative to the conventional turbidite concepts, is crucial because the turbidite paradigm is built on a dubious foundation without empirical data on sandy turbidity currents in modern oceans. In the absence of evidence for sandy turbidity currents in natural environments, elegant theoretical models and experimental observations of turbidity currents are irrelevant substitutes for explaining the origin of sandy deposits as "turbidites." In documenting modern and ancient SMTDs (sandy slides, sandy slumps, and sandy debrites) and BCRSs (deposits of thermohaline [contour] currents, wind-driven currents, and tidal currents), the author describes and interprets core and outcrop (1:20 to 1:50 scale) from 35 case studies worldwide (which include 32 petroleum reservoirs), totaling more than 10,000 m in cumulative thickness, carried out during the past 36 years (1974-2010). The book dispels myths about the importance of sea level lowstand and provides much-needed clarity on the triggering of sediment failures by earthquakes, meteorite impacts, tsunamis, and cyclones with implications for the distribution of deep-water sandstone petroleum reservoirs. Promotes pragmatic interpretation of deep-water sands using alternative possibilities Validates the economic importance of SMTDs and BCRS in deep-water exploration and production Rich in empirical data and timely new perspectives

New Perspectives on Early Social-Cognitive Development, Volume 258 in the Progress in Brain Research series, highlights new advances in the field, with this new volume presenting interesting chapters on topics such as Dynamics of Coordinated Attention, Investigating the Role of Neural Body Maps in Early Social-Cognitive Development: New Insights from Infant MEG and EEG, Motion tracking in developmental research: Methodological considerations and social-cognitive developmental applications, Early maturation of the social brain: How brain development provides a platform for the acquisition of social-cognitive

competence, Getting a grip on early intention understanding: The role of motor, cognitive, and social factors, and much more. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Progress in Brain Research series Includes the latest information on New Perspectives on Early Social-cognitive Development New Perspectives on Virtual and Augmented Reality discusses the possibilities of using virtual and augmented reality in the role of innovative pedagogy, where there is an urgent need to find ways to teach and support learning in a transformed learning environment. Technology creates opportunities to learn differently and presents challenges for education. Virtual reality solutions can be exciting, create interest in learning, make learning more accessible and make learning faster. This book analyses the capabilities of virtual, augmented and mixed reality by providing ideas on how to make learning more effective, how existing VR/AR solutions can be used as learning tools and how a learning process can be structured. The virtual reality (VR) solutions can be used successfully for educational purposes as their use can contribute to the construction of knowledge and the development of metacognitive processes. They also contribute to inclusive education by providing access to knowledge that would not otherwise be available. This book will be of great interest to academics, researchers and post-graduate students in the field of educational technology. Through pressing, current case studies, contributors examine the ubiquitous interplay among migration, development, culture, human rights, and government, all toward advancing more effective solutions to international migration issues. New Perspectives on Grammar Teaching in Second Language Classrooms brings together various approaches to the contextualized teaching of grammar and communicative skills as integrated components of second language instruction. Its purpose is to show from both theoretical and practical perspectives that grammar teaching can be made productive and

useful in ESL and EFL classrooms. In this text: *First-rate scholars approach the teaching of grammar from multiple complementary perspectives, providing an original, comprehensive treatment of the topic. *Discourse analysis and research data are used to address such pedagogical areas as grammatical and lexical development in speaking, listening, reading, and writing. *The communicative perspective on ESL and EFL instruction that is presented provides ways for learners to enhance their production skills, whereas the meaning-based grammar instruction can supplement and strengthen current methodology with a communicative focus. This volume is intended as a foundational text for second language grammar pedagogy courses at the advanced undergraduate and master's levels. Experts from all over the world take a critical, highly international and often controversial perspective on the ADHD phenomenon - a condition that has reached global proportions, significantly affecting the lives of children, parents and teachers worldwide. This book raises a number of concerns often not covered by the material currently available to parents and practitioners. Critical New Perspectives on ADHD unpicks the myths surrounding the development of this phenomenon and leaves no stone unturned in its search for answers. An in-depth exploration into the reasons for the emergence and maintenance of ADHD lead to suggested explanations of the dominance of US psychiatric models and the need for new markets for major pharmaceutical companies, as well as the functions that ADHD diagnoses fulfil in families, classrooms and communities. In a world where moves to educational inclusion are paradoxically paralleled by the ever-increasing use of medication to control children's behaviour, this book scrutinises current accepted practice and offers alternative perspectives and strategies for teachers and other education professionals. This is an invaluable resource for anyone with a serious interest in ADHD and other behavioural difficulties. This edited collection explores the

immense potential of translanguaging in educational settings and highlights teachers and students negotiating language ideologies in their everyday communicative practices. It makes a significant contribution to scholarship on translanguaging and considers the need for pedagogy to reflect and embrace diversity. The chapters provide rich empirical research and document translanguaging in varied educational contexts, with studies from pre-school to adult education in different, mainly European, countries, where English is not the dominant language. Together they expand our understanding of translanguaging and how it can be applied to a variety of settings. This book will be of interest to students and researchers, especially in education, language education and applied linguistics, as well as to professionals and policymakers. As an experiment in reconnecting academia to the broader democracy, this work is designed to invigorate public policy debate by rededicating academic work to the pursuit of solutions to society's great problems. For well over a century, the United Fruit Company (UFCO) has been the most vilified multinational corporation operating in Latin America. Criticism of the UFCO has been widespread, ranging from politicians to consumer activists, and from labor leaders to historians, all portraying it as an overwhelmingly powerful corporation that shaped and often exploited its host countries. In this first history of the UFCO in Colombia, Marcelo Bucheli argues that the UFCO's image as an all-powerful force in determining national politics needs to be reconsidered. Using a previously unexplored source—the internal archives of Colombia's UFCO operation—Bucheli reveals that before 1930, the UFCO worked alongside a business-friendly government that granted it generous concessions and repressed labor unionism. After 1930, however, the country experienced dramatic transformations including growing nationalism, a stronger labor movement, and increasing demands by local elites for higher stakes in the banana export business. In response to these circumstances, the company abandoned production, selling

its plantations (and labor conflicts) to local growers, while transforming itself into a marketing company. The shift was endorsed by the company's shareholders and financial analysts, who preferred lower profits with lower risks, and came at a time in which the demand for bananas was decreasing in America. Importantly, Bucheli shows that the effect of foreign direct investment was not unidirectional. Instead, the agency of local actors affected corporate strategy, just as the UFCO also transformed local politics and society. *New Perspectives in Cultural Resource Management* describes the historic developments, current challenges, and future opportunities presented by contemporary Cultural Resource Management (CRM). CRM is a substantial aspect of archaeology, history, historical architecture, historical preservation, and public policy in the US and other countries. Chapter authors are innovators and leaders in the development and contemporary practice of CRM. Collectively they have conducted thousands of investigations and managed programs at local, state, tribal, and national levels. The chapters provide perspectives on the methods, policies, and procedures of historical and contemporary CRM. Recommendations are provided on current practices likely to be effective in the coming decades. An indispensable survey of the most dynamic contemporary drawing, chosen by leading art world professionals - now in paperback More than 250,000 copies of books in the acclaimed 'Vitamin' series have been bought by art lovers across the world. In 2005, *Vitamin D* inaugurated a vibrant period for drawing, followed by *Vitamin D2*, which showcased 115 outstanding artists pushing the medium's boundaries. With nominations from over 70 international critics and curators and an introduction by drawing expert Christian Rattemeyer, *Vitamin D2* provides a broad overview of drawing while also looking towards its future. Artists include: Charles Avery, Pablo Bronstein, Paul Chan, Ewan Gibbs, Cameron Jamie, Aleksandra Mir, Amalia Pica, Imran Qureshi, Adrián Villar Rojas Nominators

include: Lynne Cooke, Thelma Golden, Christine Macel, Jessica Morgan, Bob Nickas, Hans Ulrich Obrist, Scott Rothkopf, Beatrix Ruf, Barry Schwabsky, Nancy Spector Introduction by: Christian Rattemeyer, Associate Curator of Drawings at the Museum of Modern Art in New York
