Digital Knowledge Maps in Education Aug 25 2020 Digital knowledge maps are 'at a glance' visual representations that enable enriching, imaginative and transformative ways for teaching and learning, with the potential to enhance positive educational outcomes. The use of such maps has generated much attention and interest among tertiary education practitioners and researchers over the last few years as higher education institutions around the world begin to invest heavily into new

technologies designed to provide online spaces within which to build resources and conduct activities. The key elements of this edited volume will comprise original and innovative contributions to existing scholarship in this field, with examples of pedagogical possibilities as they are currently practiced across a range of contexts. It will contain chapters that address, theory, research and practical issues related to the use of digital knowledge maps in all aspects of tertiary education and draws predominantly on international perspectives with a diverse group of invited contributors. Reports on empirical studies as well as theoretical/conceptual chapters that engage deeply with pertinent questions and issues raised from a pedagogical, social, cultural, philosophical, and/or ethical standpoint are included. Systematic literature reviews dealing with digital knowledge mapping in education are also an integral part of the volume.

Nov 15 2019 This novel is about how North Korea became the Democratic People's Republic (DPR) even though there was nothing democratic or republican about a communist government over the Korean people. In this tale we delve into the need for Christians to pray for North Korea, a country whose leaders make citizens bow down to statues. Those Koreans who lived there during the Korean War and survived had kids - and since their government makes it illegal to seek God, they need the church worldwide to address the Lord for them. But they are not the only ones who need the tears of the saints: the men who fought in North Korea for the liberty of Korea had to return to their home countries and live with the battles in their heads. Therefore, this story is a call to intercession for them too. And not only for them, but for their children, who have had to live with adults who carried the scars of war - a war which was fought to do away with a godless form of government in the Far East. What is more, North Korea should not be ignored: some have escaped, and many wish to. Perhaps North Korea will be conquered by good men soon, and no doubt it eventually will - this meditation is a start in the right direction.

The Canadian Connection Apr 13 2022 For years after his wife's death, Dan Nichols, salesman, pilot, and father, cruises through life on autopilot. Having sold his business at an early age, he grows tired of doing nothing but play golf. When his good friend James "Stump" Reynolds, an aircraft broker, asks him to deliver an airplane to the owner of Intermont Mini and Supply Company in Anchorage, Alaska, Dan jumps at the chance for an adventure. Soon after Dan arrives in Anchorage, he meets Jessica Lane, the beautiful vice president of Intermont. When the president of Intermont offers Dan a position as chief pilot of the firm, Dan eagerly takes the job and looks forward to becoming better acquainted with Jessica. But trouble looms. One of Dan's pilots decides to get rich by helping a friend deliver nuclear components to an anonymous contact and steals an Intermont airplane to make the delivery. The commander of a North Korean submarine receives orders to retrieve the hijacked nuclear material. Suddenly, Dan is thrust into the middle of an international incident that resounds all the way to the White House. Full of intrigue and suspense, *The Canadian Connection* is a non-stop thrill ride

Things of Darkness Jul 24 2020 The "Ethiopian," the "tawny Tartar," the "woman blackamoore," and "knotty Africanisms"—allusions to blackness abound in Renaissance texts. Kim F. Hall's eagerly awaited book is the first to view these evocations of blackness in the contexts of sexual politics, imperialism, and slavery in early modern England. Her work reveals the vital link between England's expansion into realms of difference and otherness—through exploration and colonialism—and the highly charged ideas of race and gender which emerged. How, Hall asks, did new connections between race and gender figure in Renaissance ideas about the proper roles of men and women? What effect did real racial and cultural difference have on the literary portrayal of blackness? And how did the interrelationship of tropes of race and gender contribute

modern conception of individual identity? Hall mines a wealth of sources for answers to these questions: travel literature from Sir John Mandeville's *Travels* to Leo Africanus's *History and Description of Africa*; lyric poetry and plays, from Shakespeare's *Antony and Cleopatra* and *The Tempest* to Ben Jonson's *Masque of Blackness*; works by Emilia Lanier, Philip Sidney, John Webster, and Lady Mary Wroth; and the visual and decorative arts. Concentrating on the sixteenth and seventeenth centuries, Hall shows how race, sexuality, economics, and nationalism contributed to the formation of a modern (white, male) identity in English culture. The volume includes a useful appendix of not readily accessible Renaissance poems on blackness.

European Data Protection: Coming of Age Sep 06 2021 On 25 January 2012, the European Commission presented its long awaited new "Data protection package". With this proposal for a drastic revision of the data protection framework in Europe, it is fair to say that we are witnessing the rebirth of European data protection, and perhaps, its passage from an impulsive youth to a more mature state. Technology advances rapidly and mobile devices are significantly changing the landscape. Increasingly, we carry powerful, connected, devices, whose location and activities can be monitored by various stakeholders. Very powerful social network sites emerged in the first half of last decade, processing personal data of millions of users. Updating the regulatory network was imminent and the presentation of the new package will initiate a period of intense debate in which the proposals will be thoroughly commented upon and criticized and numerous amendments will undoubtedly be proposed. This volume brings together some 19 chapters offering conceptual analyses, highlighting issues, proposing solutions, and discussing practices regarding privacy and data protection. In the first part of the book, conceptual analyses of concepts such as privacy and anonymity are

provided. The second section focuses on the contrasted positions of children and ageing users in the information society. The third section provides four chapters on privacy by design, including discussions on roadmapping and concrete techniques. The fourth section is devoted to surveillance and profiling, with illustrations from the domain of smart metering, self-surveillance and the benefits and risks of profiling. The book concludes with case studies pertaining to communicating privacy to organisations, the fate of a data protection supervisor in one of the EU member states and data protection in social network sites and online media. Information Systems Aug 05 2021 This unique new textbook on Information Systems (IS) provides an answer to a few basic questions in the field: What is the scientific nature of IS? How do we design IS in today's connected world? What is the relationship between IS and innovation in knowledge economies? Whereas mainframe corporate computers tended to dominate the thinking in the 1980s, the dominant factor today is personal digital devices that connect the world as one whole IS. Network science is emerging to describe these digital connections (e.g., social networking), and service science is similarly emerging to describe service value networks. This book therefore synthesizes the emerging network science and service science with the classic IS theory, resulting in a new set of principles for IS strategic planning. It also reviews the standard IS topics of system analysis and database design, covering the whole spectrum of databases and all the major methods and techniques of database design. The role of IS as a technological innovation in the knowledge economy is also analyzed. In doing so, new concepts such as basic values of IS, systems of IS, sustainability of IS, IS as a service system, IS as a human value network, and the hyper-network model for innovation by IS, are developed.

The Mental Connection Mar 12 2022 The Mental Connection is a fictional story of a young man and woman who are strangers that find they have the ability, under certain circumstances, to communicate telepathically. This ability soon brings them together and their lives take on an adventure they didn't expect. The story begins with a frightening event that triggers the telepathic powers and leads to more serious adventures. Romance flourishes and that brings on more problems. An abortion by a friend adds a troubling moral situation.

Advanced Analysis and Design of Steel Frames May 14 2022 Steel frames
are used in many commercial high-rise buildings, as well as industrial
structures, such as ore mines and oil rigs. Enabling construction of even
lighter and safer structures, steel frames have become an important topic
for engineers. This book, split into two parts covering advanced analysis
and advanced design of steel frames, guides the reader from a broad
array of frame elements through to advanced design methods such as
deterministic, reliability, and system reliability design approaches. This
book connects reliability evaluation of structural systems to advanced
analysis of steel frames, and ensures that the steel frame design described
is founded on system reliability. Important features of the this book
include: fundamental equations governing the elastic and elasto-plastic
equilibrium of beam, shear-beam, column, joint-panel, and brace
elements for steel frames; analysis of elastic buckling, elasto-plastic
capacity and earthquake-excited behaviour of steel frames; background
knowledge of more precise analysis and safer design of steel frames
against gravity and wind, as well as key discussions on seismic analysis
theoretical treatments, followed by numerous examples and applications
a review of the evolution of structural design approaches, and reliability
based advanced analysis, followed by the methods and procedures for
how to establish practical design formula. Advanced Design and Analysis
of Steel Frames provides students, researchers, and engineers with an
integrated examination of this core civil and structural engineering topic.
The logical treatment of both advanced analysis followed by advanced
design makes this an invaluable reference tool, comprising of reviews,
methods, procedures, examples, and applications of steel frames in one
complete volume.

The Authoritarian Public Sphere May 22 2020 Authoritarian regimes craft and disseminate reasons, stories, and explanations for why they are entitled to rule. To shield those legitimating messages from criticism, authoritarian regimes also censor information that they find threatening. While committed opponents of the regime may be violently repressed, this book is about how the authoritarian state keeps the majority of its people quiescent by manipulating the ways in which they talk and think about political processes, the authorities, and political alternatives. Using North Korea, Burma (Myanmar) and China as case studies, this book explains how the authoritarian public sphere shapes political discourse in each context. It also examines three domains of potential subversion of legitimating messages: the shadow markets of North Korea, networks of independent journalists in Burma, and the online sphere in China. In addition to making a theoretical contribution to the study of authoritarianism, the book draws upon unique empirical data from fieldwork conducted in the region, including interviews with North Korean defectors in South Korea, Burmese exiles in Thailand, and Burmese in Myanmar who stayed in the country during the military government. When analyzed alongside state-produced media, speeches, and legislation, the material provides a rich understanding of how autocratic legitimation influences everyday discussions about politics in the authoritarian public sphere. Explaining how autocracies manipulate the ways in which their citizens talk and think about politics, this book will be of interest to students and scholars of Asian politics, comparative politics and authoritarian regimes.

Mended Feb 23 2023 Music has the power to heal, but not all broken hearts can be mended. Always in control, Xander Wilde considered life on the road to be a perfect fit for him. But when disaster strikes on the band's latest tour, fate intervenes...and a newly single Ivy Taylor, the girl he has ever loved, steps back into his life. After moving past her painful breakup with Xander years ago, Ivy was poised to become the next big name in music...when suddenly she withdrew from the limelight—the same day she announced her engagement to her control

agent, Damon Wolf. Xander knows he should keep his distance. But once they're on the road, he can't resist pursuing her for a second chance. A jealous Damon can't let her go—and he's keeping dangerous secrets that could destroy them all. When the three of them come together, everything falls apart. But if Xander and Ivy can hold tight to the bond that connects them, they just might have a chance to reclaim the love they thought they had lost forever....

The Great Successor Jun 30 2021 The behind-the-scenes story of the rise and reign of the world's strangest and most elusive tyrant, Kim Jong Un, by the journalist with the best connections and insights into the bizarre and dangerous world of North Korea. Since his birth in 1984, Kim Jong Un has been swaddled in myth and propaganda, from the plainly silly--he could supposedly drive a car at the age of three--to the grimly bloody stories of family members who perished at his command. Anna Fifield reconstructs Kim's past and present with exclusive access to sources close to him and brings her unique understanding to explain the dynastic mission of the Kim family in North Korea. The archaic notion of despotic family rule matches the almost medieval hardship the country has suffered under the Kims. Few people thought that a young, untested, unhealthy Swiss-educated basketball fanatic could hold together a country that should have fallen apart years ago. But Kim Jong Un has not just survived, he has thrived, abetted by the approval of Donald Trump and diplomacy's weirdest bromance. Skeptical yet insightful, Fifield creates a captivating portrait of the oddest and most secretive political regime in the world--one that is isolated yet internationally relevant, bankrupt yet in possession of nuclear weapons--and its ruler, the self-proclaimed Beloved and Respected Leader, Kim Jong Un.

Parliaments in Asia Dec 09 2021 Political scientists examine the parliaments of India, Bangladesh, Korea, Japan, China, Mongolia, and Nepal. They describe the country and legislature in general, and analyze how they work as legislatures, the impact of external and internal variables in determining their place in the political system, and other features. The working hypotheses are that external factors determine legislature's place in the political system, and that internal factors determine its place within that category. The collection was first published in The Journal of Legislative Studies vol. 4, no. 4 (1998). Distributed in the US by ISBS. Annotation copyrighted by Book News, Inc., Portland, OR

Our Animal Connection Jan 10 2022 This book covers the many ways humans benefit from interactions with other living species. By studying animals of all kinds and sizes, from microbial organisms to elephants and whales, we can learn about their adaptations to extreme conditions on planet Earth, about the evolutionary development of specialized capabilities, and about their ways to defend themselves against predators and diseases. The authors discuss the strengths and weaknesses of Homo sapiens, and how the study of animals can make us stronger and healthier. To deepen our knowledge of genetics, molecular and cell biology, physiology and medicine, we need to study model organisms. To cure human disease, we can learn from animals how they have evolved ways to protect themselves. To improve human performance, we can study the animal kingdom's top performers and learn from their successes. Considering these important pointers, the authors review genetic engineering techniques that can translate our existing and future animal connections into benefits for human health and performance. Finally, they discuss the challenges associated with our animal connection: the history of pandemics caused by bacterial and viral pathogens demonstrates that there is a risk for transmission of disease that can disrupt human societies. The recent COVID-19 outbreak is covered in detail as an example.

The Phoenix Project Jun 22 2020 ***Over a half-million sold! The sequel, The Unicorn Project, is coming Nov 26*** "Every person involved in a failed IT project should be forced to read this book."—TIM O'REILLY, Founder & CEO of O'Reilly Media "The Phoenix Project is a must read for business and IT executives who are struggling with the growing complexity of IT."—JIM WHITEHURST, President and CEO, Red Hat, Inc. Five years after this sleeper hit took on the world of IT and flipped it on its head, the 5th Anniversary Edition of The Phoenix Project continues to guide IT in the DevOps revolution. In this newly updated and expanded edition of the bestselling The Phoenix Project, co-author

Gene Kim includes a new afterword and a deeper delve into the Three Ways as described in *The DevOps Handbook*. Bill, an IT manager at Parts Unlimited, has been tasked with taking on a project critical to the future of the business, code named Phoenix Project. But the project is massively over budget and behind schedule. The CEO demands Bill must fix the mess in ninety days or else Bill's entire department will be outsourced. With the help of a prospective board member and his mysterious philosophy of The Three Ways, Bill starts to see that IT work has more in common with a manufacturing plant work than he ever imagined. With the clock ticking, Bill must organize work flow streamlining interdepartmental communications, and effectively serve the other business functions at Parts Unlimited. In a fast-paced and entertaining style, three luminaries of the DevOps movement deliver a story that anyone who works in IT will recognize. Readers will not only learn how to improve their own IT organizations, they'll never view IT the same way again. "This book is a gripping read that captures brilliantly the dilemmas that face companies which depend on IT, and offers real-world solutions."—JEZ HUMBLE, Co-author of *Continuous Delivery*, *Lean Enterprise*, *Accelerate*, and *The DevOps Handbook* ———— "I'm delighted at how *The Phoenix Project* has reshaped so many conversations in technology. My goal in writing *The Unicorn Project* was to explore and reveal the necessary but invisible structures required to make developers (and all engineers) productive, and reveal the devastating effects of technical debt and complexity. I hope this book can create common ground for technology and business leaders to leave the past behind, and co-create a better future together."—Gene Kim, November 2019

Dependencies, Connections, and Other Relationships Oct 19 2022 This work covers, in its subsequent parts, ontology, the metaphysics of causation and the philosophy of mind. It provides a firm theoretical basis for believing that in our all-physical world mental causation is perfectly real and that it can be understood.

Making Healthy Places, Second Edition Oct 15 2019 The first edition of *Making Healthy Places* offered a visionary and thoroughly researched

treatment of the connections between constructed environments and human health. Since its publication over 10 years ago, the field of health and community design has evolved significantly to address major societal problems, including health disparities, obesity, and climate change. More recently, the COVID-19 pandemic has upended how we live, work, learn, play, and travel. In *Making Healthy Places, Second Edition: Designing and Building for Well-Being, Equity, and Sustainability*, planning and public health experts Nisha D. Botchwey, Andrew L. Dannenberg, and Howard Frumkin bring together scholars and practitioners from across the globe in fields ranging from public health, planning, and urban design, to sustainability, social work, and public policy. This updated and expanded edition explains how to design and build places that are beneficial to the physical, mental, and emotional health of humans, while also considering the health of the planet. This edition expands the treatment of some topics that received less attention a decade ago, such as the relationship of the built environment to equity and health disparities, climate change, resilience, new technology developments, and the evolving impacts of the COVID-19 pandemic. Drawing on the latest research, *Making Healthy Places, Second Edition* imparts a wealth of practical information on the role of the built environment in advancing major societal goals, such as health and well-being, equity, sustainability, and resilience. This update of a classic is a must-read for students and practicing professionals in public health, planning, architecture, civil engineering, transportation, and related fields.
