Five exciting Teenage Mutant Ninja Turtles stories are collected in one hardcover storybook! More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read. "It's rad what I do." -Mike Blabac

Since I started bamboo research in 1974, I have collected many publications on bamboo. However, in contacts with other researchers I became aware of the fact that several of these publications were unknown to them. Consequently their activities in research or in bamboo projects had to start at a lower level than if they had known some of these publications. Therefore, I discussed the need for a book like this with several colleagues, and I decided to start writing. In this book I present data on properties, as published by researchers. Certainly it is not complete; e.g. the proceedings of the bamboo workshop in Cochin in November 1988 are not included; they arrived just too late to be taken into account. On the other hand, in writing this preface I realize I have forgotten my own thesis. I do apologize to any colleague whose relevant report is not taken into account as well. I like to express my feelings of respect to the board of my faculty: they allowed me to spend so much time on this book, and they gave a considerable financial support for the printing costs. Travel with Olympic gold medalist Jessie Diggins on her compelling journey from America's heartland to international sports history, navigating challenges and triumphs with rugged grit and a splash of glitter Pyeongchang, February 21, 2018. In the nerve-racking final seconds of the women's team sprint freestyle race, Jessie Diggins dug deep. Blowing past two of the best sprinters in the world, she stretched her ski boot across the finish line and lunged straight into Olympic immortality: the first ever cross-country skiing gold medal for the United States at the Winter Games. The 26-year-old Diggins, a four-time World Championship medalist, was literally a world away from the small town of Afton, Minnesota, where she first strapped on skis. Yet, for all her history-making achievements, she had never strayed far from the scrappy 12-year-old who had insisted on portaging her own canoe through the wilderness, yelling happily under the unwieldy weight on her shoulders: "Look! I'm doing it!" In *Brave Enough*, Jessie Diggins reveals the true story of her journey from the American Midwest into sports history. With candid charm and characteristic grit, she connects the dots from her free-spirited upbringing in the woods of Minnesota to racing in the bright spotlights of the Olympics. Going far beyond stories of races and ribbons, she describes the challenges and frustrations of becoming a

serious athlete; learning how to push through and beyond physical and psychological limits; and the intense pressure of competing at the highest levels. She openly shares her harrowing struggle with bulimia, recounting both the adversity and how she healed from it in order to bring hope and understanding to others experiencing eating disorders. Between thrilling accounts of moments of triumph, Diggins shows the determination it takes to get there—the struggles and disappointments, the fun and the hard work, and the importance of listening to that small, fierce voice: I can do it. I am brave enough. This volume presents the proceedings of CLABIO 2015 - II Latin American Conference on Bioimpedance, held in Montevideo, Uruguay - September 30 - October 02, 2015. A revolutionary guide to acknowledging fear and developing the tools we need to build a healthy relationship with this confusing emotion—and use it as a positive force in our lives. We all feel fear. Yet we are often taught to ignore it, overcome it, push past it. But to what benefit? This is the essential question that guides Kristen Ulmer's remarkable exploration of our most misunderstood emotion in *The Art of Fear*. Once recognized as the best extreme skier in the world (an honor she held for twelve years), Ulmer knows fear well. In this conversation-changing book, she argues that fear is not here to cause us problems—and that in fact, the only true issue we face with fear is our misguided reaction to it (not the fear itself).

Rebuilding our experience with fear from the ground up, Ulmer starts by exploring why we've come to view it as a negative. From here, she unpacks fear and shows it to be just one of 10,000 voices that make up our reality, here to help us come alive alongside joy, love, and gratitude. Introducing a mindfulness tool called "Shift," Ulmer teaches readers how to experience fear in a simpler, more authentic way, transforming our relationship with this emotion from that of a draining battle into one that's in line with our true nature. Influenced by Ulmer's own complicated relationship with fear and her over 15 years as a mindset facilitator, *The Art of Fear* will reconstruct the way we react to and experience fear—empowering us to easily and permanently address the underlying cause of our fear-based problems, and setting us on course to live a happier, more expansive future.
