The expansion and popularity of the Internet, along with the addition of wireless data functionality to wireless networks, has also contributed greatly to the growth of the wireless industry. In fact, the anticipated consumer demand for high bandwidth wireless data is commonly seen as the driving force behind current network upgrades and expansions. The number and types of companies aggressively investing in wireless technologies illustrate the importance of wireless data. Non-traditional telecommunications companies such as Cisco Systems, Intel, Microsoft, 3Com, and other professional services companies, are investing heavily in wireless product development and many have formed partnerships with wireless infrastructure manufacturers to help deliver wireless data services seamlessly to consumers. Written by a respected author this self-contained overview of wireless data technologies will provide a highly sought after technical reference to all those working within the main areas of Wireless Data Services. Provides a self-contained reference which discusses the key wireless technologies including security Presents an overview of the wireless industry and its key components such as GSM, GPRS, CDMA, TDMA, UMTS, cdma2000, and Spread Spectrum, 802.11, 15 and 16 standards Discusses the currently hot topic of Wireless Security Includes a Foreword by Dr Bill Hancock, Chief Security Officer, Exodus Communications/Cable & Wireless Provides a ready reference as well as a reference to additional materials on each topic Essential reading for all staff working for Telecom companies: engineers, researchers, managers etc. As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world. Provides a current and thorough introduction to computers by integrating usage of the World Wide Web with the printed text. Acquiring wisdom is one of the foremost quest for us, the great hominids or the human species! Wisdom is not always found in textbooks or in the libraries. Can you find wisdom on the sideways? Or are you too focused on what lies ahead, the never ending rat race, or your next material achievement and ignore the fact that the most profound wisdom that we can imbibe lies on the sideways of our lives, as it is happening every second with every breath of ours. We are so focused on following a routine and a never ending external competition that we conveniently ignore that life is giving us loads of wisdom with every passing second, with the challenges that are thrown upon us, the strangers we meet, sudden incidents that happen out of nowhere, the good thing and the bad ones too, and the many surprises that comes our way. While we are occupied in our minds at several places, our life touches us with so much to learn from things around us. We just need to observe it closely, sometimes, the best moments are often captured on sideways and not on the front. A Word to the Wise is a collection of 48 life strategies that can offer you a different prism to perceive and interpret wisdom to transform yourself as a person and a career professional in a very non-conventional manner. The ability to observe life, to be able to feel the rain on our palms and the wind on our face, to wander aimlessly, and to be always curious are also the traits of seeking and acquiring wisdom from the greatest teacher in this world – our life. Wisdom is always around us, while we search for it at many other places, it is waiting to be discovered by us, sitting silently on the sideways of life.
