InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. This is a black and white edition of the original book. Man v Fat is a practical and supportive resource for men,

written by a normal bloke who just wanted to lose some weight. One day Andrew Shanahan took a guttie to text to a mate. But once he had taken the photo, he couldn't stop looking at it. He realised how unhappy he was about his body and resolved to change it. However he soon learned that the dieting industry had turned its back on men. Men were expected to get fit, tone up and turn fat into a six-pack in six weeks. There was nothing for men who simply wanted to lose their beer belly, play football again and feel more confident. So Andrew decided to do something about this. In *Man v Fat*, Andrew Shanahan will give you everything you need to know in order to lose weight, breaking it down into three essential components: Stage 1: Understand why you got fat Stage 2: Learn how to lose weight Stage 3: Create a winning structure *Man v Fat* is not a diet book or a commercial diet plan. It will explain (and myth-bust) the various diets available, so you can choose the one that will work best for you - or even create your own. It will help you to supercharge your motivation, set specific goals and teach you how to track and review them, identify threats and create a support network, and of course troubleshoot common hurdles. There are plans to get you walking, running or cycling (optional activity) or make the most of obligatory activity. Plus a perfect week plan and perfect month plan to get you started. In the battle of man against fat, this book is your ultimate weapon., , New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. Click the buy button now. "A vibrant piece of fiction, pulsating with events and emotions... Seems destined to be read a hundred years from now." —Martin Rubin, Los Angeles Times Each house on Pepys Road, an ordinary street in London, has seen its fair share of first steps and last breaths, and plenty of laughter in between. But each of the street 's residents—a rich banker and his shopaholic wife, a soccer prodigy from Senegal, Pakistani shop owners, a dying old woman and her graffiti-artist son—is receiving a menacing postcard with a simple message: "We Want What You Have." Who is behind this? What do they really want? In *Capital*, John Lanchester ("an elegant and wonderfully witty writer"—New York Times) delivers a warm and compassionate novel that captures the anxieties of our time—property values going up, fortunes going down, a potential terrorist around every corner—with an unforgettable cast of characters. Beyond cutting edge, Mueller goes where no computer book author has gone before to produce a real owner's manual that every laptop owner should have. This book shows the upgrades users can perform, the ones that are better left to the manufacturer, and more.
