Interpreting Changes Over Time in High School Average ACT' College Readiness Assessment Composite Scores and ACT College Readiness Benchmark Attainment Rates. ACT Research Report Series, 2013 (9) May 31 2021 Education officials and journalists frequently track changes over time in the average ACT' College Readiness Assessment Composite scores and ACT College Readiness Benchmark attainment rates of individual high schools. Using standard statistical methods, I examined how often changes in these statistics are unambiguously positive or negative, rather than plausibly due to chance (random variation). I studied two-year differences, five-year trends, ten-year trends, and the difference between the most recent five-year period and the preceding five-year period. For a large majority of high schools, changes over the time periods studied were ambiguous: They could plausibly be attributed to random variation among student cohorts. For example, two-year differences in the average ACT Composite score were plausibly due to chance at 91% of schools; five-year trends were plausibly due to chance at 79% of schools; and ten-year trends were plausibly due to chance at 64% of schools. This result is also true of changes adjusted for student background characteristics and prior achievement. As one would expect, unambiguous changes tend to be large and based on large numbers of ACT-tested students. This report describes simple ways for school officials to predict whether observed changes are unambiguous without doing a formal statistical analysis. Tables are appended.

**Differential Effects of Using ACT College Readiness Assessment Scores and High School GPA to Predict First-year College GPA Among Racial/ethnic, Gender, and Income Groups

Do Current State Standards and Assessments Reflect College Readiness? Oct 16 2022 Do state standards and assessments provide accurate, meaningful information about the college readiness levels of the state's high school students? To suggest an answer to this question, this study examined data from one state in which students in grades 8 and 10 take both a statewide assessment and the corresponding component of ACT's Educational Planning and Assessment System (EPAS)[TM]. EPAS consists of three programs: (1) EXPLORE[R], for students in grades 8 and 9, which provides baseline information on the academic preparation of students that can be used to plan high school coursework; (2) PLAN, for students in grade 10, which provides a midpoint review of students' progress toward their education and career goals while there is still time to make necessary interventions; and (3) The ACT Assessment[R] (or "ACT"), for students in grades 11 and 12, which measures students' academic readiness to make successful transitions to college and work after high school. The results of this study show that in at least one case there is evidence that state standards and state assessments alone do not accurately reflect the college readiness levels of the students in the state. This study demonstrates that using EXPLORE/PLAN in conjunction with a state assessment increases the likelihood that the state's students will be ready for college and work by the time they finish high school. (Contains 1 table, 4 figures and 2 footnotes.)

Profile of State College and Career Readiness Assessments (CCR) Policy. Arkansas Jul 01 2021 This individual profile provides information on Arkansas' college and career readiness assessment policy. Some of the categories presented include: (1) CCR assessment policy; (2) Purpose; (3) Major changes in CCR assessment policy since the 2009-10 school year for financial reasons; (4) State financial support for students to take the CCR assessment; and (5) Is the CCR assessment used by postsecondary institutions for undergraduate admission purposes? A Case Study on the Preenrollment Assessment of Student Academic Readiness and Student Retention in Private For-Profit Colleges Oct 24 2020 As an industry, private for-profit colleges have not considered the academic readiness of prospective students prior to enrollment into their institutions. Student retention practices focus on keeping students in school after enrollment; however, if students lack the cognitive ability, the academic proficiency, or the self-efficacy to overcome personal life challenges, student retention programs will be ineffective. When private for-profit colleges enroll students into their institutions with the primary objective of increasing profits, this represents a risk for the institution and to the students, should those students drop out of college and/or default on their student loans. This case study explored the necessity of conducting preenrollment assessments of student academic readiness and if those assessments had an impact on student retention.

Profile of State College and Career Readiness Assessments (CCR) Policy. School Readiness Assessment Review Summary Jun 12 2022

Incorporating ACT Scores Into Your Statewide Assessment. Issues in College Readiness Jul 13 2022 One of the most challenging issues a state must resolve in designing a statewide standards and college readiness assessment is that of how student scores should be reported. The ACT is an effective and reliable measure of student readiness for college and work, but in some cases states may wish to augment the ACT with tests of their own design. In these cases where multiple tests from different sources are included in the student assessment, how does an individual create a common score scale that combines information about student achievement across tests? This question is frequently asked of ACT by states that use, or are considering using, the ACT as part of their state assessment. ACT's simple, straightforward approach is based on the use of "scale" scores, in which raw scores from different forms of an assessment are converted to a common

scale for reporting, and scale scores from assessments with differing requirements or differing numbers of items are combined onto a single, common scale. This method ensures both that equivalent scores on the different forms of the assessments will refer to an equivalent level of achievement and that equivalent aggregate scores made up of the individual scale scores from each assessment will refer to an equivalent level of achievement.

Profile of State College and Career Readiness Assessments (CCR) Policy. Minnesota Feb 25 2021 This individual profile provides information on Minnesota's college and career readiness assessment policy. Some of the categories presented include: (1) CCR assessment policy; (2) Purpose; (3) Major changes in CCR assessment policy since the 2009-10 school year for financial reasons; (4) State financial support for students to take the CCR assessment; and (5) Is the CCR assessment used by postsecondary institutions for undergraduate admission purposes? [For the full report, "The report, State High School Tests: Changes in State Policies and the Impact of the College and Career Readiness Movement," see ED530163.].

School Readiness Jan 19 2023 Noting that the latest messages communicated to the public about the learning problems of American children emphasize children's lack of social maturity and premature school entry, this book examines the many complex issues surrounding school readiness and entry. The 15 chapters are divided into 4 sections. The first section includes an introduction and overview of school readiness and a discussion of the concept of school readiness. The second section deals with assessing readiness. This section presents issues in early childhood screening and assessment, comparisons of some current readiness and screening tests, and an analysis of the Gesell School Readiness Test. Also discussed in this section is the social and emotional adjustment of children considered "young" for their age. The third section examines school practices. This section covers issues in the entrance age debate, an analysis of the influence of entrance age on achievement, and the transition room experience. In addition, the section discusses retention in kindergarten and first grade, intervention and remediation programs for young children, and issues affecting early childhood education. The final section of the book examines the related issues of parental reactions, and ethical and legal issues in the educational placement of children. The last chapter in this section offers a recapitulation with some final issues for consideration. Contains 19 pages of references. (VL)

Reshaping the College Transition Aug 14 2022 Early college readiness assessments as well as "transition" curricula designed to help high school students avoid remedial coursework upon arrival to college represent promising approaches to decrease the numbers of entering college students who are academically underprepared. Yet little is known about the availability of these interventions across the country. The authors of this short paper conducted a scan to ascertain in which states these approaches have been undertaken and to find out whether they are developed through statewide initiatives or by individual colleges and schools. Some form of early college readiness assessment is offered in 38 states, and in 25 of these states there is a state initiative for implementation. Transition curricula are offered in 29 states, and in 8 of these states there is a statewide initiative. Findings also suggest that the number of state and local initiatives is growing.
