The book presents the state-of-the-art of biomaterials used in the human body and reports new research on various Ti-based alloys with non-toxic elements (Mo, Zr, Ta, Si, Nb, etc.) aimed at improved mechanical properties, corrosion resistance and biocompatibility. Specific laboratory tests are reported for structural characterization, mechanical properties and corrosion resistance testing, and cytotoxicity assessment. Keywords: Titanium Alloys, Biomedical Materials, Cytotoxicity Assessment, Biocompatibility, Production and Properties of Ti-Mo-Zr-Ta Alloys, Surface Modification, Powder Metallurgy, Characterization of Ti-Mo-Zr-Ta-Alloys, Mechanical Properties, Differential Scanning Calorimetry, Electrochemical Behavior, Optical Microstructure, X-ray Diffraction, Thermal Characterization, Corrosion Resistance, Medical Applications. Eristica lui Schopenhauer este o opera mereu actuala. Zilnic, in mod inconstient aplicam eristica in relatii inter umane. Cu eristica avem de face in cadrul mass-media, mai ales cand politicieni ca Tariceanu, Dragnea sau Basescu incearca sa convinga publicul ca oponentul

reprezinta dusmanul de care toti bunii cetateni ar trebui sa fuga. Dar scopul acestei carti nu este de a invata elementele eristicii in scop negativ. Eristica a fost conceputa ca fiind arta de a comunica in mod corect si creator. Aristotel spunea ca eristica are obligatia sa evite nonsensurile, si trebuie totodata sa aduca solutii la toate problemele dezbatute. Eristica are obligatia de a dezarma si demasca pe oponentul care incearca sa utilizeze mijloacele josnice doar pentru a arata ca numai el are dreptate. The multiple facets of this volume belong to five large themes. The first theme, that of persuasion and manipulation, is studied here through electoral campaigns (i.e., mental filters used in voting manipulation, the mechanisms of vote mobilisation, manipulation and storytelling models). The institutionalization of education represents the second theme, approached here through specific interdisciplinary instruments: the intersection of higher education with public learning, the answers of the knowledge society to the issues of contemporary work problems, the institutional relationships used to solve educational problems specific to childhood and adolescence, as well as the role of media competencies in professional development. The third theme is related to the inheritance and transmission of cultural identity, instrumentalized through issues such as: the duty of intergenerational justice with regard to cultural heritage, education and vocational training in library science, the social inclusion role of public and digital libraries. The collective and cultural identity of communities represents the fourth large theme, being approached through a triple perspective: the philosophical background of restoring the political dignity of communities, the communication space as a point of a needle towards the community space, and the communicational issue of the European capital of culture programmes. Lastly, the fifth theme belongs to practical and applied philosophy, specifically philosophical counselling, debating issues such as: the identification of the communicational background for this type of counselling, the secular approach to the problem of evil from a philosophical counselling perspective, the discussion of Platon's attitude towards suicide and of frank speech in the Epicurean school, the socio-anthropological perspective of immortality, as well as the formal approach of the relationship between real and imaginary. The volume includes selected and reviewed papers from the European Automotive Congress held in Bucharest, Romania, in November 2015. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in fuel economy and environment, automotive safety and comfort, automotive reliability and maintenance, new materials and technologies, traffic and road transport systems, advanced engineering methods and tools, as well as advanced powertrains and hybrid and electric drives.
