Provides an understanding of the nature of drug use among minorities by summarizing data on this issue. The data came from several large and small-scale epidemiological studies that collect and analyze data on the incidence, prevalence, morbidity, mortality, and other adverse health consequences of drug use among racial/ethnic populations. Chapters: definition of race and ethnicity; overview of drug use and drug related problems; population statistics for racial/ethnic minorities in the U.S.; drug use in the general population; prevalence of drug use among youth; youth drug use and risky behaviors; and adverse health consequences; drugs and crime. Examines the educational progress & challenges that racial & ethnic minorities face in the U.S. This report shows that over time larger numbers of minorities have completed high school & continued their education in college. Despite these gains, progress has varied, & differences persist among Hispanic, Black, American Indian/Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, &

white students on key indicators of educational performance. Extensive charts & tables. This best-selling, comprehensive book on racial and ethnic relations in the U.S. covers theoretical issues and the experiences of more than 50 specific groups. Covers more racial, ethnic, and religious groups than any other book of its kind, providing broad, yet specific coverage of Europeans, Native Americans, African Americans, Hispanics, Arabs, religious minorities, and women as a minority group. For anyone with an interest in Ethnic Studies, Race and Ethnicity in the United States, Sociology of Minorities, Immigrant History, Sociology, American studies, interdisciplinary studies, Anthropology, or History. This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been

explored in detail. The report also highlights successful strategies to prevent young people from using tobacco.

Understand the Changing Dynamics of the U.S. Population

The 13th edition of Schaefer's *Racial and Ethnic Groups* places current and ethnic relations in a socio-historical context to help readers understand the past and shape the future. This best-selling *Race & Ethnic Relations* text is grounded in a socio-historical perspective with engaging stories and first person accounts. *Race and Ethnic Groups* helps students understand the changing dynamics of the U.S. population by examining our history, exploring our current situation, and discussing concerns for the future. This text provides an accessible, comprehensive, and up-to-date introduction to the present issues that confront racial and ethnic groups in the U.S. and around the world. It incorporates the most current statistics and data in the marketplace including the most recent census.

Teaching & Learning Experience

Personalize Learning

The new MySocLab delivers proven results in helping

students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking Robust end-of-chapter materials provide students with chapter summary and study materials that help them develop critical thinking skills. Engage Students Every chapter contains first-hand commentaries that demonstrate the diversity of various groups. Explore Research Research intertwined with information on current events and demographics provide a modern view of our society. Understand Diversity Detailed coverage of multiple racial, ethnic, and other minority groups provide students with an extensive view of diverse relations. Support Instructors Strong supplements package with author-reviewed activities and assessments in MySocLab. Note: MySocLab does not come automatically packaged with this text. To purchase MySocLab, please visit: www.mysoclab.com or you can purchase a valuepack of the

text + MySocLab (at no additional cost). ValuePack ISBN-10: 0205248152 / ValuePack ISBN-13: 9780205248155 Focuses on special populations (youth, women of childbearing age, blacks, American Indians, Asian or Pacific islanders, and those of Hispanic origin) at risk for drug abuse and provides reasons for its findings. In-depth look at the minority health issues and plans for adequate care for those minorities. Covers: marijuana, cocaine, heroin, cigarettes, and alcohol. Includes: drug-related emergency department episodes; medical examiner cases of drug-related deaths; HIV infection and AIDS; and sexually transmitted diseases. References. Fifty-six charts and tables. In *Alcohol Use/Abuse Among Latinos: Issues and Examples of Culturally Competent Services*, you will learn how to design and improve services for Latinos with substance abuse problems by understanding that the cultures and personal backgrounds of your clients are crucial to the counseling process. This text will also show you how these service skills apply to the individual, family, or an entire

community. Studies show that, according to patients, culturally sensitive and responsive practitioners are generally more credible, trusted, and effective. Alcohol Use/Abuse Among Latinos takes into account several different aspects that will help you develop these traits and provide successful services for Latinos dealing with alcohol or other drug problems. You'll gain valuable insight into: the five elements that are vital to a successful ATOD (Alcohol, tobacco and Other Drug) service--multiculturalism, resilience/strengths, competence, community capacity development, and community participation--plus a detailed explanation of why they are needed step-by-step instructions for using three methods, supervision, inservice training, and consultation, as means of providing ongoing learning of cross-cultural competencies to practitioners why key factors such as economic background, gender, and sexual orientation need to be taken into consideration for ATOD services to be effective demographic patterns and case studies of Latino users and abusers

of alcohol and other drugs that illustrate the growing number of Latinos in need of ATOD services why the practitioner needs to be aware of how family importance, values attached to cooperation versus competition, sociability, respect, and action-oriented problem-solving play a role in effective services for Latinos the need for practitioners to understand how ethnic identity, biculturality, Spanish language fluency, gender-specific role expectations, skin color, and overall sense of self can affect the success of services for Latino teenagers how excessive marketing of alcohol to Latino communities, lack of representation, and a lack of community involvement are key barriers to successful ATOD services for Latinos Alcohol Use/Abuse Among Latinos also discusses Latino mens' and womens' individual needs concerning substance abuse. One of the topics addressed, the loss of self-esteem, has been found to be a contributing factor to alcohol use and abuse for Latinas. It offers ways you can promote self-esteem in your Latina clients by focusing on their

cultural heritage and pride. In addition, this text takes a unique look Latina lesbians and how training through educational and agency internship programs can promote awareness to your clients' special needs concerning substance abuse. Alcohol Use/Abuse Among Latinos will help you provide all of your Latino clients with efficient and culture-friendly services for resisting or overcoming the abuse of alcohol, tobacco, or other drugs. This comprehensive title is among the first to extensively use newly released 2010 U.S. Census data to examine multiculturalism today and tomorrow in America. This distinction is important considering the following NPR report by Eyder Peralta: "Based on the first national numbers released by the Census Bureau, the AP reports that minorities account for 90 percent of the total U.S. growth since 2000, due to immigration and higher birth rates for Latinos." According to John Logan, a Brown University sociologist who has analyzed most of the census figures, "The futures of most metropolitan areas in the country are

contingent on how attractive they are to Hispanic and Asian populations.” Both non-Hispanic whites and blacks are getting older as a group. “These groups are tending to fade out,” he added. Another demographer, William H. Frey with the Brookings Institution, told The Washington Post that this has been a pivotal decade. “We’re pivoting from a white-black-dominated American population to one that is multiracial and multicultural.”

Multicultural America: A Multimedia Encyclopedia explores this pivotal moment and its ramifications with more than 900 signed entries not just providing a compilation of specific ethnic groups and their histories but also covering the full spectrum of issues flowing from the increasingly multicultural canvas that is America today. Pedagogical elements include an introduction, a thematic reader’s guide, a chronology of multicultural milestones, a glossary, a resource guide to key books, journals, and Internet sites, and an appendix of 2010 U.S. Census Data. Finally, the electronic version will be the only reference work on

this topic to augment written entries with multimedia for today's students, with 100 videos (with transcripts) from Getty Images and Video Vault, the Agence France Press, and Sky News, as reviewed by the media librarian of the Rutgers University Libraries, working in concert with the title's editors. Adolescent substance abuse is the nation's #1 public health problem. It originates out of a developmental era where experimentation with the world is increasingly taking place, and where major changes in physical self and social relationships are taking place. These changes cannot be understood by any one discipline nor can they be described by focusing only on the behavioral and social problems of this age period, the characteristics of normal development, or the pharmacology and addictive potential of specific drugs. They require knowledge of the brain's systems of reward and control, genetics, psychopharmacology, personality, child development, psychopathology, family dynamics, peer group relationships, culture, social policy, and more. Drawing

on the expertise of the leading researchers in this field, this Handbook provides the most comprehensive summarization of current knowledge about adolescent substance abuse. The Handbook is organized into eight sections covering the literature on the developmental context of this life period, the epidemiology of adolescent use and abuse, similarities and differences in use, addictive potential, and consequences of use for different drugs; etiology and course as characterized at different levels of mechanistic analysis ranging from the genetic and neural to the behavioural and social. Two sections cover the clinical ramifications of abuse, and prevention and intervention strategies to most effectively deal with these problems. The Handbook's last section addresses the role of social policy in framing the problem, in addressing it, and explores its potential role in alleviating it. Contains information on a variety of subjects within the field of education statistics, including the number of schools and colleges, enrollments,

teachers, graduates, educational attainment, finances, Federal funds for education, libraries, international education, and research and development. Adolescence is a developmental period of accelerating physical, psychological, social! cultural, and cognitive development, often characterized by confronting and surmounting a myriad of challenges and establishing a sense of self-identity and autonomy. It is also, unfortunately, a period fraught with many threats to the health and well-being of adolescents and with substantial consequent impairment and disability. Many of the adverse health consequences experienced by adolescents are, to a large extent, the result of their risk behaviors. Many adolescents today, and perhaps an increasing number in the future, are at risk for death, disease, and other adverse health outcomes that are not primarily biomedical in origin. In general, there has been a marked change in the causes of morbidity and mortality among adolescents. Previously, infectious diseases accounted for a disproportionate

share of adolescent morbidity and mortality. At present, however, the overwhelming toll of adolescent morbidity and mortality is the result of lifestyle practices. This Handbook presents current research on children and youth in ethnic minority families. It reflects the development currently taking place in the field of social sciences research to highlight the positive adaptation of minority children and youth. It offers a succinct synthesis of where the field is and where it needs to go. It brings together an international group of leading researchers, and, in view of globalization and increased migration and immigration, it addresses what aspects of children and youth growing in ethnic minority families are universal across contexts and what aspects are more context-specific. The Handbook examines the individual, family, peers, and neighborhood/policy factors that protect children and promote positive adaptation. It examines the factors that support children's social integration, psychosocial adaptation, and external functioning. Finally, it looks at the

mechanisms that explain why social adaptation occurs. For courses in Race and Ethnic Relations Examine the story of race and ethnic relations, past and present Revel (TM) Strangers to These Shores: Race and Ethnic Relations in the United States helps students understand how racial and ethnic groups came to be, how they are changing, and how they will continue to change in the future. As in previous editions, author Vincent Parrillo begins each chapter with a sociohistorical perspective on a specific segment of the U.S. population and closes with a sociological analysis of the group's experiences using the functionalist, conflict, and interactionist perspectives. Available for Fall 2020 classes, the Digital Update includes fresh videos and Current Event Bulletins, as well as updated data throughout. Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read,

think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience -- for less than the cost of a traditional textbook. NOTE: This Revel Combo Access pack includes a Revel access code plus a loose-leaf print reference (delivered by mail) to complement your Revel experience. In addition to this access code, you will need a course invite link, provided by your instructor, to register for and use Revel. Contents: Chapter 1: Introduction; Chapter 2: Key Findings: An Overview and Integration Across Five Populations; Chapter 3: Study Design and Procedures; Chapter 4: Prevalence of Drug Use in Early and Middle Adulthood; Chapter 5: Trends in Drug Use in Early and Middle Adulthood; Chapter 6: Attitudes and Beliefs about Drugs Among Young Adults; Chapter 7: The Social Context; Chapter 8: Prevalence of Drug Use Among College Students; Chapter 9: Trends in Drug Use Among College Students. Charts and tables. Draws together data from multiple sources to address the issue of substance use and

related consequences for minority subgroups of the U.S. population. Serves as an information source for the direction and scope of prevention and intervention programs. For courses in Race and Ethnic Relations Highlight the changing dynamics of the U.S. population Revel (R) Racial and Ethnic Groups helps students view race and ethnic relations in a sociohistorical context, so they can understand the past and see how to shape the future. Author Richard Schaefer's narrative is driven by engaging first-person accounts that illuminate the changing dynamics of the U.S. population, and reveal the stories behind these changes. Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience -- for less than the cost of a traditional textbook.
