The romantic and poignant second novel in the stunning trilogy by a New York Times bestselling author about a down-and-out waitress who's swept off her feet by a rock star. After all the pain and grief that marked the beginning of Cass and Tucker's relationship, they're finally building a life together—just the two of them, his three bandmates, some groupies, and thousands of screaming fans. And not everyone is as happy about the couple's reunion as they are. The last thing Cass wants to do is create friction within the band—especially when *Damaged* is on the brink of achieving the success Tucker has worked so hard for. She's thrilled to finally be with a man who loves and protects her as much as he does. But how can she carve out a place for herself in this new rock star world . . . without being swallowed by the shadow of Tucker's fame? Five dishonored soldiers. Former Special Forces. LONGLISTED FOR THE BBC SAMUEL JOHNSON PRIZE This study focuses on the study of metallurgy in pre-colonial Zambia to 1890. A general review of the literature on metallurgy in pre-colonial Zambia reveals that during the period our study (up to 1890), three metals were mined. Iron production was a widespread, important and significant phenomenon, responsible for producing utility tools, axes, knives, weapons, spears, arrow heads and broad knives, and regalia for the political and religious office holders. Copper, which was confined to few areas; and gold to even fewer areas. Metallurgy was an important economic activity in which all ethnic groups participated in different levels of intensity. From iron ore which was smelted in elaborate and complicated processes imbued in magic, song, dance, incantations, medicines, and taboos by members of exclusively male guilds, blacksmiths were able to produce the

following: (a) tools used in agriculture: hoes, axes used to clear forestays or areas to be cultivated to grow food for subsistence, non-edible crops such as tobacco and hemp which were smoked as part of relaxation, cotton used to make blankets and shawls, needles for mending clothes, and knives for a variety of uses; (b) hunting using varieties of spears to hunt game, seek protection from dangerous animals, for defence of resources or offence to capture desired resources; (c) various sizes of hooks used in fishing different varieties of fish; and (d) making of regalia used in chieftaincies and priesthood as symbols of authority. Copper was also smelted and put in ingots of varying sizes and rods of varying sizes and lengths, which were (a) used to make copper wires as wires, rods, vessels and other utensils, copper smiths produced jewellery and ornaments and cast art pieces such as statues and necklaces worn by men and women as status symbols; (b) used in exchange of goods and services as currency; and (c) used to produce regalia for the for those in authority. Gold was mined directly and processed into making as variety of items such as buttons and regalia. In its various forms of development and sophistication, metallurgy was responsible for the economic, social and political advances among the pre-colonial societies. A variety of skills was required for building furnaces, producing charcoal, smelting and forging iron into goods. Metallurgy and production of various items that were needed and necessary for an improved life were generally not an enclave activity but a process that satisfied the totality of socioeconomic needs. It also promoted the gender division of labour within community. Wealth from the Rocks is therefore a detailed study of the place, role, and function of metallurgy in pre-colonial Zambian societies. This is Nick Armbrister's first collection of short stories, written from the late 90's to the present day. They cover several topics, like his poems, but in

much more depth—from satanic actions by people worshipping an evil god ('Loss of the Ice Queen') to warriors of the sky using man's most powerful weapons in anger ('Final Flight'), to an attempt to control fate ('Spell to Find Amelia Earhart'), and to a post-nuclear townscape ('Second History', set in Oldham). Two of the stories are fragments of larger uncompleted/lost work that deserve inclusion here. One day these projects may well see the light of day, but for now, the author hopes the reader will enjoy his 'dark work'-in time he hopes to do a follow-up. These stories span his entire writing career. Though he prefers poetry as a means of incisive, concentrated power of expression, he loves short stories for their fun; even those that give one a glimpse into the dark side that lurks beneath the surface of life "The story of the emperor, the general, and the talented and beautiful. Everyone has heard quite a few stories. Those feelings of love, love, love and affection, sweet and sweet were all indescribably beautiful. It wasn't human color at all. "Compulsively readable." —The New York Times Book Review
"Inventive and thrilling. . . . I couldn't put it down." —Brit Bennett, #1 New York Times bestselling author of *The Vanishing Half*

The gripping story of one scientist in outer space, another who watches over him, the family left behind, and the lengths people will go to protect the people and planet they love For twenty years, Alex has believed that his gene-edited super-algae will slow and even reverse the effects of climate change. His obsession with his research has jeopardized his marriage, his relationships with his kids, and his own professional future. When the Son sisters, founders of the colossal tech company Sensus, offer him a chance to complete his research, he seizes the opportunity. The

catch? His lab will be in outer space on Parallaxis, the first-ever luxury residential space station built for billionaires. Alex and six other scientists leave Earth and their loved ones to become Pioneers, the beta tenants of Parallaxis. But Parallaxis is not the space palace they were sold. Day and night, the embittered crew builds the facility under pressure from Sensus, motivated by the promise that their families will join them. At home on Earth, much of the country is ablaze in wildfires and battered by storms. In Michigan, Alex's teenage daughter, Mary Agnes, struggles through high school with the help of the ubiquitous Sensus phones implanted in everyone's ears, archiving each humiliation, and wishing she could go to Parallaxis with her father—but her mother will never allow it. The Pioneers are the beta testers of another program, too: Sensus is designing an algorithm that will predict human behavior. Katherine Son hires Tess, a young social psychologist, to watch the experiment's subjects through their phones—including not only the Pioneers, but Katherine's sister, Rachel. Tess begins to develop an intimate, obsessive relationship with her subjects. When Tess and Rachel travel to Parallaxis, the controlled experiment begins to unravel. Prescient and insightful, *A House Between Earth and the Moon* is at once a captivating epic about the machinations of big tech and a profoundly intimate meditation on the unmistakably human bonds that hold us together. How many times have parents, grandparents, teachers and other adults asked that question about the young people in their lives? This book provides answers both surprising and inspiring. Young people today are faced with enormous pressure and a near constant stream of conflicting messages from sources that didn't exist merely five years ago. Sources that seek to influence the way they think, how they dress, how they spend their money and how they navigate through the world. It's an exciting and

confusing time for students and adults. It is our mission to encourage young people to let their voices be heard. Some stories aren't easy to tell. Some situations aren't easy to relive. But I was raised to be strong-to hold my own. Because of it, I was hurt, torn down, beaten and even had my heart snatched right out of my chest. But I'm ready now. It's time for me to speak up. You want to know what really goes on inside my head, well I'm right here. Real. Raw. Intense. This is all me. Roy Sykes. This is my story, and trust me... its far from pretty. Johan Egerkrans long dreamed of illustrating the Norse mythology, and when he released Norse Gods in Swedish it was an immediate success. Egerkrans re-tells the most exciting and imaginative sagas of the Norse mythology: From the creation myth in which the first giant Ymer is hacked to pieces by Odin and his brothers, to the gods final destruction in Ragnarök. This is a gorgeously illustrated book in which gods, giants, dwarves, monsters and heroes are presented in all their glory. A book for those who already know and love these stories, as well as for those who have yet to discover Scandinavian mythology. A definitive work for readers of all ages. It is a pleasure to be enchanted by the suggestive visualizations of Angerboda, Hel, Freya, Utgarda-Loki, Mimer and Surt. Dick Harrison, Svenska Dagbladet Divine. LitteraturMagazinet In The White Mirror, the follow-up to Elsa Hart's critically acclaimed debut, Jade Dragon Mountain, Li Du, an imperial librarian and former exile in 18th century China, is now an independent traveler. He is journeying with a trade caravan bound for Lhasa when a detour brings them to a valley hidden between mountain passes. On the icy planks of a wooden bridge, a monk sits in contemplation. Closer inspection reveals that the monk is dead, apparently of a self-inflicted wound. His robes are rent, revealing a strange symbol painted on his chest. When the rain turns to snow, the caravan

is forced to seek hospitality from the local lord while they wait for the storm to pass. The dead monk, Li Du soon learns, was a reclusive painter. According to the family, his bizarre suicide is not surprising, given his obsession with the demon world. But Li Du is convinced that all is not as it seems. Why did the caravan leader detour to this particular valley? Why does the lord's heir sleep in the barn like a servant? And who is the mysterious woman traveling through the mountain wilds? Trapped in the snow, surrounded by secrets and an unexplained grief that haunts the manor, Li Du cannot distract himself from memories he's tried to leave behind. As he discovers irrefutable evidence of the painter's murder and pieces together the dark circumstances of his death, Li Du must face the reason he will not go home and, ultimately, the reason why he must.

"Lele is a bulls-eye target at her new school in Miami until, overnight, her digital fame catapults the girl with cheerleader looks, a seriously silly personality, and a self-deprecating funny bone into the popular crowd. Now she's facing a whole new set of challenges--the relentless drama, the ruthless cliques, the unexpected internet celebrity--all while trying to keep her grades up and make her parents proud"-- "[A]n excellent book..." —The Economist Financial Times Asia editor David Pilling presents a fresh vision of Japan, drawing on his own deep experience, as well as observations from a cross section of Japanese citizenry, including novelist Haruki Murakami, former prime minister Junichiro Koizumi, industrialists and bankers, activists and artists, teenagers and octogenarians. Through their voices, Pilling's *Bending Adversity* captures the dynamism and diversity of contemporary Japan. Pilling's exploration begins with the 2011 triple disaster of earthquake, tsunami, and nuclear meltdown. His deep reporting reveals both Japan's vulnerabilities and its resilience and pushes him to understand

the country's past through cycles of crisis and reconstruction. Japan's survivalist mentality has carried it through tremendous hardship, but is also the source of great destruction: It was the nineteenth-century struggle to ward off colonial intent that resulted in Japan's own imperial endeavor, culminating in the devastation of World War II. Even the postwar economic miracle—the manufacturing and commerce explosion that brought unprecedented economic growth and earned Japan international clout might have been a less pure victory than it seemed. In *Bending Adversity* Pilling questions what was lost in the country's blind, aborted climb to #1. With the same rigor, he revisits 1990—the year the economic bubble burst, and the beginning of Japan's "lost decades"—to ask if the turning point might be viewed differently. While financial struggle and national debt are a reality, post-growth Japan has also successfully maintained a stable standard of living and social cohesion. And while life has become less certain, opportunities—in particular for the young and for women—have diversified. Still, Japan is in many ways a country in recovery, working to find a way forward after the events of 2011 and decades of slow growth. *Bending Adversity* closes with a reflection on what the 2012 reelection of Prime Minister Shinzo Abe, and his radical antideflation policy, might mean for Japan and its future. Informed throughout by the insights shared by Pilling's many interview subjects, *Bending Adversity* rigorously engages with the social, spiritual, financial, and political life of Japan to create a more nuanced representation of the oft-misunderstood island nation and its people. The *Financial Times* "David Pilling quotes a visiting MP from northern England, dazzled by Tokyo's lights and awed by its bustling prosperity: 'If this is a recession, I want one.' Not the least of the merits of Pilling's hugely enjoyable and perceptive book on Japan is that

he places the denunciations of two allegedly “lost decades” in the context of what the country is really like and its actual achievements.” The Telegraph (UK) “Pilling, the Asia editor of the Financial Times, is perfectly placed to be our guide, and his insights are a real rarity when very few Western journalists communicate the essence of the world’s third-largest economy in anything but the most superficial ways. Here, there is a terrific selection of interview subjects mixed with great reportage and fact selection... he does get people to say wonderful things. The novelist Haruki Murakami tells him: “When we were rich, I hated this country”... well-written... valuable.” Publishers Weekly (starred): "A probing and insightful portrait of contemporary Japan." Advancing to higher levels of ritual magic with purpose and power requires an exaltation of consciousness-a spiritual transformation that

can serve as an antidote to the seeming banality of modern life. Based on Kabbalistic techniques, the teachings of the Hermetic Order of the Golden Dawn, and an Hermetic tradition spanning nearly two thousand years, this innovative new work introduces the history of the Golden Dawn and its mythology, the Tree of Life, Deities, demons, rules for practicing magic, and components of effective ritual. A comprehensive course of self-initiation using Israel Regardie's seminal Golden Dawn as a key reference point, Kabbalah, Magic and the Great Work of Self-Transformation guides you through the levels of the Golden Dawn system of ritual magic. Each grade in this system corresponds with a sphere in the Kabbalistic Tree of Life and includes daily rituals, required reading, written assignments, projects, and additional exercises. Knowledgeable and true to tradition, author Lyam Thomas Christopher presents a well-grounded and modern step-by-step program toward spiritual attainment, providing a lucid gateway toward a more awakened state. addition to the literature of the Napoleonic Wars. The hit FireNine series from New York Times bestselling author Shanora Williams continues... Montana Delray is the most laid back of the popular rock band, FireNine. He's goofy, charming, blatantly honest, talented, a massive flirt, and extremely handsome. The girls literally throw themselves at him, and he accepts it. He loves the attention. The fame. The parties. His single life. With so many women to choose from, it's not in his nature to chase after just one, but when Lauren Harkin enters his life, that all changes. Lauren is smart, sexy, confident, and knows exactly how to get under his skin... and although he hates to admit it, he loves it. He wants her in every way possible, but she doesn't want anything to do with him. Famous FireNine rocker, Delray isn't the kind of guy Lauren needs to bring into her life. After having her emotions tampered with repeatedly, she refuses to give into someone who will most likely take her for granted and make things worse. But with much effort and some sexual manipulation, Montana and Lauren come to an agreement neither of them can resist. As their fling carries on, though, everything intensifies, and once they realize it true fear sets in. Soon they come to the realization that they care for one another more than intended, and they both know caring for someone other than themselves means opening their hearts. The reality they face with each other is totally unexpected and becomes their biggest fear... and neither of them is ready for it. Tells what happened on August 5, 1949 in Man Gulch, Montana when fifteen smokejumpers came to fight a forest fire. This correspondence, which encompasses Truman's courtship of his wife, his service in the senate, his presidency, and after, reveals not only the character of Truman's mind but also a shrewd observer's view of American politics. Eight months. That's how long it's been since Eliza last saw Gage and they both feel as if

they don't deserve one another's forgiveness. He screwed up. She walked away without looking back. They'll try and make up all the time they've lost with one another, that is until they're facing the choices of either going their separate ways, or hanging on and fighting for dear life. The fights will be endless. Their heartache will be real. The demons will return, and they won't back down without a fight. There are some who will do anything to keep true love apart, and those same people will dig deep into their demonic ways until Eliza and Gage are literally no more. Can Eliza and Gage overcome it all? Will they be able to face the true demons that are seeking to destroy them? Or will they just forget about everything they've worked so hard for and go their separate ways? Sometimes you have to go through struggles in order to reach an ultimate point of peace... but will their struggle be worth it? Crouched in the doorway of a Travelair over the Flathead National Forest, Frank Fowler waits for the slap that will send him dropping from the sky to his first fire as a smokejumper. How he got there is the journey of a young man who grew up on the streets of Washington, D.C. When he was six his father died, yet his mother instilled in him the value of looking on the positive side of life and the importance of self-confidence. She encouraged him to seek adventure and to write about his experiences. Sent in his teens to live with a brother and family in a Maryland suburb, he became involved in Boy Scouts. There he met Scoutmaster Joe Woolfolk, a forester from Montana on assignment at the Washington headquarters of the U.S. Forest Service, who became Frank's mentor. Joe returned to Montana, but visited Maryland after Frank's high school graduation and suggested a career in forestry. There was an offer of employment while going to college, and for someone with little money and no desire to attend college locally, the idea had great appeal, even

if it was thousands of miles away. He left all he had known in the East to find his adventure in the West; to attend Montana State University (now the University of Montana) in Missoula; and to work four summers for the Forest Service as a smokejumper. He shared his exploits with his mother in frequent and detailed letters that she saved. An aspiring author herself, she encouraged him to write about parachuting to forest fires. Those letters are the basis for this memoir *High-mountain Two-manner*. His writing style invites you to go with him as he trains, works in the woods, and fights forest fires. He also shares with you the joys of working in the back-country and savoring the beauty of wild places. In spite of the likelihood that you haven't met Frank, by the end of the book you may have the distinct feeling that you have. Disaster, disruption and change are recurring challenges in business. We are used to reading about the successful disruptors of established industries (Tesla, Amazon, Netflix, Uber, etc.), but what about the companies they disrupted? What ever happened to them? How did they cope? And more importantly, what are the secrets of making a business thrive again? "Business Leadership Under Fire: Nine Steps to Rescue and Transform Organizations" is the book every business leader needs. It will inspire readers with its thoughtful, practical and battle-hardened recipes for success. Pepyn Dinandt usually gets parachuted into an organization only after it realizes it is in real trouble. It is his job to assess and understand the situation that faces the business while also devising effective ways forward towards recovery and success. In "Business Leadership Under Fire" Dinandt draws on his own extensive business experience and, with the help of decorated army officer Colonel Richard Westley, marries this proven expertise with the leadership insights of military thinkers to develop an imaginative and practical nine-step plan for any

leader who wishes not simply to survive but to inspire and thrive "under fire". Using lessons forged on the front lines of both the military and commercial worlds, Dinandt and Westley's concise book is required reading for anyone in any organization that needs help in turbulent times. Eliza Smith has never been the one to seek a relationship. She's never dated a guy in her life, never even hugged a man (outside of her father/manager of the hot and popular rock band, FireNine) but when she decides to spend her summer on tour with FireNine, it all changes. Eliza really gets to meet Gage Grendel - her former crush from high school and the lead singer of FireNine - and witness sides to him to which she'll begin to truly despise. She'll ignore him, she'll dislike his ways, she'll do anything to try to stay away from him until Gage finally gets her to slip up and give in. She agrees on a casual fling with Gage, but soon they'll both see how the fling will blur into something they can't control and when it's finally time for Eliza to go and accomplish her own dreams, she'll know there's more she took from Gage than she ever thought possible.
