*SafeFITS - Safe Future Inland Transport Systems* Feb 07 2022 This report presents the results of the project Safe Future Inland Transport Systems (SafeFITS), which aims to develop a robust road safety decision-making tool to support the most appropriate road safety policies and measures to achieve tangible results. Road accidents constitute a major social problem in modern societies, accounting for more than 1 million accidents per year in EU-28 (2,900 per day), resulting in 1.4 million injuries and 26,000 fatalities. Current trends suggest that, unless action is taken, traffic injuries will become the fifth leading cause of death by 2030, with the disparity between high-income and low-income countries further increased.

### [Addressing Challenging](#)

[Moments in Psychotherapy](#) Jun 30 2021 "This practical and

helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational

concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

[Head First Physics](#) Jun 11 2022

Wouldn't it be great if there were a physics book that showed you how things work instead of telling you how? Finally, with *Head First Physics*, there is. This comprehensive book takes the stress out of learning mechanics and practical physics by providing a fun and engaging experience, especially for students who "just don't get it." *Head First Physics* offers a format that's rich in visuals and full of activities, including pictures, illustrations, puzzles, stories, and quizzes -- a mixed-media style proven to stimulate learning and retention. One look will convince you: This isn't mere theory, this is

physics brought to life through real-world scenarios, simple experiments, and hypothetical projects. Head First Physics is perfect for anyone who's intrigued by how things work in the natural world. You'll quickly discover that physics isn't a dry subject. It's all about the world we live in, encompassing everything from falling objects and speeding cars, to conservation of energy and gravity and weightlessness, and orbital behavior. This book: Helps you think like a physicist so you can understand why things really work the way they do Gives you relevant examples so you can fully grasp the principles before moving on to more complex concepts Designed to be used as a supplement study guide for the College Board's Advanced Placement Physics B Exam Introduces principles for the purpose of solving real-world problems, not memorization Teaches you how to measure, observe, calculate - - and yes -- how to do the math Covers scientific notation, SI units, vectors, motion,

momentum conservation, Newton's Laws, energy conservation, weight and mass, gravitation and orbits, circular motion and simple harmonic motion, and much more If "Myth Busters" and other TV programs make you curious about our physical world -- or if you're a student forced to take a physics course -- now you can pursue the subject without the dread of boredom or the fear that it will be over your head. Head First Physics comes to rescue with an innovative, engaging, and inspirational way to learn physics!

### Women and Empire 1750-1939

Jul 12 2022 First published in 2008. Women and Empire, 1750-1939 functions to extend significantly the range of the History of Feminism series (co-published by Routledge and Edition Synapse), bringing together the histories of British and American women's emancipation, represented in earlier sets, into juxtaposition with histories produced by different kinds of imperial and colonial governments. The alignment of writings from a

range of Anglo-imperial contexts reveals the overlapping histories and problems, while foregrounding cultural specificities and contextual inflections of imperialism. The volumes focus on countries, regions, or continents formerly colonized (in part) by Britain: Volume I: Australia, Volume II: New Zealand, Volume III: Africa, Volume IV: India, Volume V: Canada. Perhaps the most novel aspect of this collection is its capacity to highlight the common aspects of the functions of empire in their impact on women and their production of gender, and conversely, to demonstrate the actual specificity of particular regional manifestations. Concerning questions of power, gender, class and race, this new Routledge-Edition Synapse Major Work will be of particular interest to scholars and students of imperialism, colonization, women's history, and women's writing.
